

Environmental Examination Report

(1) Project Name

Heavy Fuel Oil-fired Thermal Power Plant Project

(2) Project Site

Jeddah City, Makkah Province, Kingdom of Saudi Arabia

(3) Project Outline

Construction of the Heavy Fuel Oil-fired Thermal Power Plant

(4) Category Classification

A

(5) Reason for Classification

The project falls into the category of large-scale thermal power sector under the JBIC Environmental Guidelines. Also, it has environmental sensitive characteristics and is located in or near sensitive areas under the JBIC Environmental Guidelines.

(6) Environmental Permits and Approvals

The Environmental Impact Assessment (EIA) on the project was prepared in compliance with laws and regulations in Kingdom of Saudi Arabia and is planned to be approved by the General Environmental Regulations in December 2013. Through such approval process, information of the project was announced to the public.

(7) Pollution Mitigation Measures

Air quality, water quality, waste, noise and vibration are properly managed in accordance with local standards.

(8) Natural Environment

The project site is not located within or around national parks and natural protected areas. It is confirmed that measures for the protection of natural environment are properly managed.

(9) Social Environment

Although it is confirmed that there is no resettlement caused by the

project implementation, appropriate measure for local residents who will be affected by the project is under consideration.

(1 0) International Standard

World Bank - Safe Guard Policy

(1 1) Others, Monitoring

Taking the above environmental review into consideration, JBIC will monitor the approval of EIA report, whether the collateral conditions are attached to EIA report or not (if any, compliance status with the conditions), air quality, progress of acquisition of land use rights and status of the compensation.
