

Environmental Examination Report

(1) Project Name

Freeport LNG Project in the United States of America

(2) Project Site

State of Texas, United States of America

(3) Project Outline

Construction of natural gas liquefaction facility

(4) Category Classification

Category A

(5) Reason for Classification

The project belongs to sensitive sector (the oil, natural gas and chemical material terminal sector) and includes sensitive characteristics and is located in or near sensitive areas under the guidelines.

(6) Environmental Permits and Approvals

Environmental approval for Environmental Impact Statement has been issued by competent authority as of July 2014 with some conditions attached.

(7) Pollution Mitigation Measures

It is confirmed that water quality, waste, soil contamination, sinking of land, odor, noise and vibration are properly managed.

(8) Natural Environment

Although the project site is located near the protected areas recognized as habitats for protective species under local law and IUCN red list, appropriate measures are taken to avoid impacts to the natural environment.

(9) Social Environment

Appropriate measures are taken to avoid impacts to the social

environment including the negotiation for land easement and land acquisition

(1 0) International Standard

IFC Performance Standard

(1 1) Others, Monitoring

Monitoring will be conducted for compliance status with the conditions attached to EIA report, other relevant permits, air quality standards, ecosystem and land acquisition process.
