

Environmental Examination Report

- (1) Project Name: Refinery and Petrochemical Project
- (2) Project Site: Rabigh, Kingdom of Saudi Arabia
- (3) Project Outline: Upgrade of an existing refinery, construction of new petrochemical plants, and producing and marketing of refined products and petrochemical products.
- (4) Category: A
- (5) Reason of Categorization: This project falls into the category of large-scale refinery, oil and gas pipelines and petrochemicals (manufacture of raw materials; including complexes). In addition, there are sensitive areas in the surrounding areas.
- (6) Environmental Permission: The EIA on this project has been approved by the government of the host country.
- (7) Anti-Pollution Measures: The planned value for air quality and drainage water and the quality of water complies with the local standards and is on the whole below/within the applicable international standards.
- (8) Natural Environmental Considerations: The project site including the pipeline routes are not located in the nature refuge designated by the host country government. Whereas there are sensitive areas in the area surrounding this project site, appropriate consideration have been made to alleviate impacts.
- (9) Social Considerations: The project site is located within private property and the new pipeline routes are located in the existing pipeline corridors, and no relocation of residents will occur in the project site nor pipeline routes.

- (10) Others and Monitoring: Under this project, monitoring including air quality, drainage, noise, and local marine environment, etc. will be conducted.
