Environmental Examination Report

- (1) Project Name: Petrochemical Project
- (2) Project Site: Al-Jubail, Kingdom of Saudi Arabia
- (3) Project Outline: construction of additional petrochemical plants, and producing and marketing of petrochemical products.
- (4) Category: A
- (5) Reason of Categorization: This project falls into the category of petrochemicals (manufacture of raw materials; including complexes).
- (6) Environmental Permission: The EIA on this project is not required by the government of the host country.
- (7) Anti-Pollution Measures: The planned value for air quality, water quality and drainage water, and noise level complies with the local standards and is on the whole below/within the applicable international standards.
- (8) Natural Environmental Considerations: The project site is not located in the nature refuge designated by the host country government. Whereas there are wetlands in the vicinity of the industrial city, which support bird species, no severe impacts by the project are anticipated.
- (9) Social Considerations: The project site is located in an existing industrial city, and no relocation of residents will occur in the project site.
- (10) Others and Monitoring: Under this project, monitoring including air and water quality and noise level will be conducted.
