

## Environmental Exermination Report

(1) Project Name

LNG Production and Sales Project

(2) Project Site

Ras Laffan District, State of Qatar

(3) Project Outline

The project consists of production and sale of LNG.

(4) Category Classification

A

(5) Reason for Classification

The project falls on the oil and gas development sector, a sensitive sector listed in the JBIC Environmental Guidelines. The project is also located near the sensitive areas (with rare species). This is why the project is classified as Category A.

(6) Environmental Permits and Approvals

Following the submission of the EIA report for the project to the Supreme Council for Environmental and Natural Reserves in July 2004, the environment permit was issued in December of the same year.

(7) Pollution Mitigation Measures

The projected quality of air and wastewater each falls within not only the local standards, but the World Bank standards as well.

(8) Natural Environment

While the project is located near the sensitive areas (with rare species), appropriate considerations have been made, including avoiding construction work during the reproductive period of rare species and restoring the present condition after completion of the work and so on.

(9) Social Environment

The project site is located in the existing Ras Laffan Industrial Zone. Therefore, there is no need for involuntary resettlement or land acquisition.

(10) Others, Monitoring

In this project, the impacts on air quality (SO<sub>x</sub> and NO<sub>x</sub>) from land facilities will be monitored.
