

Environmental Examination Report

(1) Project Name

Independent Power Project

(2) Project Site

Eastern part of Amman, Hashemite Kingdom of Jordan

(3) Project Outline

The project consists of the construction and operation of a power generation plant.

(4) Category

A

(5) Reason of Categorization

The project falls on the large-scale thermal power generation sector as listed in the JBIC Environmental Guidelines.

(6) Environmental Permission

Based on the laws and regulations of Hashemite Kingdom of Jordan, the EIA report for the project was prepared for submission, and the environment permit was issued by the government (Ministry of Environment.)

(7) Anti-Pollution Measures

It has been confirmed that the projected quality of air falls within the local standards. With regard to NO₂ and PM, whose background concentrations are high, the project hardly emits any of these impurities. The Jordanian Ministry of Environment has also approved the project, assessing its impact on the quality of air as very small.

(8) Natural Environment Considerations

The project site is not located in the nationally designated nature protection areas.

(9) Social Considerations

Since the project site is located in the state-owned unused land, there is no need for

involuntary resettlement under the project.

(10) Others & Monitoring

In this project, the quality of air and noise will be monitored.
