

Environmental Examination Report

(1) Project Name

Independent Power Project

(2) Project Site

Mesaieed Industrial City, State of Qatar

(3) Project Outline

The project consists of the construction and operation of a power generation plant.

(4) Category Classification

A

(5) Reason of Categorization

The project falls on the large-scale thermal power generation sector, and its site is located in sensitive areas as listed in the JBIC Environmental Guidelines.

(6) Environmental Permission

Based on the laws and regulations of Sate of Qatar, the EIA report for the project was prepared for submission, and the environment permit was issued by the government (Supreme Council for Environmental and Natural Reserves) with collateral conditions.

(7) Anti-Pollution Measures

It has been confirmed that the projected quality of air falls within the local standards. With regard to PM, whose background concentrations are high, both Mesaieed Industrial City and the government have recognized that its impact on the quality of air is very small. Regarding the projected quality of water, water temperature increase caused by discharged cooling water is expected to comply with the local standards. In addition, measures will be taken to ensure that the quality of other types of wastewater meets the local standards.

**(8) Natural Environment Considerations**

The project site is not located in the nationally designated nature protection areas.

**(9) Social Considerations**

Since the project site is located in the currently unused land, there is no need for involuntary resettlement under the project.

**(10) Others & Monitoring**

In this project, the quality of air and water, as well as noise will be monitored.
