

## Environmental Examination Report

(1) Project Name

Combined-cycle Power and Water Project

(2) Project Site

Ras Laffan Industrial City, Qatar

(3) Project Outline

The project consists of the construction and operation of power generation and seawater desalination plant.

(4) Category Classification

A

(5) Reason for Classification

The project falls into the large-scale thermal power generation sector under the Environmental Guidelines.

(6) Environmental Permits and Approvals

Based on the laws and regulations of the the State of Qatar, the EIA report for the project was prepared for submission, and the environment permit was issued by the environmental authority of the State of Qatar (Ministry of Environment).

(7) Pollution Mitigation Measures

It has been confirmed that the projected quality of air except particulates (PM 10) mostly falls within the local and the IFC/World Bank standards. This PM 10 issue is largely due to the arid nature of ground in the State of Qatar, and as such, Ministry of Environment has approved it. The projected water quality and noise fall within the local and the IFC/World Bank standards.

(8) Natural Environment

The project site is not located in the nationally designated nature protection areas.

(9) Social Environment

Since the project site is located in the currently unused land, there is no need for involuntary resettlement under the project.

(10) Others, Monitoring

In this project, the quality of air and implementation of marine turtle protection program will be monitored.
