

Environmental Examination Report

- ( 1 ) Project Name : LNG Project
- ( 2 ) Project Site : Western Australia, Australia
- ( 3 ) Project Outline : Development of natural gas field and construction of LNG plant
- ( 4 ) Category Classification : A
- ( 5 ) Reason for Classification : This project falls under the categories of the Oil and natural gas development sector, Pipeline sector, Gas terminal sector, and Ports and harbors sector. In addition, there are sensitive areas in the surrounding areas of the project.
- ( 6 ) Environmental Permits and Approvals : Approvals for the EIS for the project have been issued by the state of Western Australia and the Commonwealth of Australia.
- ( 7 ) Pollution Mitigation Measures : Adequate anti-pollution measures have been made and implemented for reducing impacts of exhaust gases, turbid water, waste, noise and vibration in accordance with Australian standards.
- ( 8 ) Natural Environment : There are natural conservation areas around the project site. Since marine animals and coral reefs exist in the areas, appropriate measures such as construction methodology to minimize impacts for them have been made and implemented.
- ( 9 ) Social Environment : Appropriate measures have been made and implemented for the cultural heritages around the on-shore project site.
- ( 1 0 ) Others, Monitoring : Monitoring will be conducted over the impact on ecosystem concerning the implementation of the project.
