

Environmental Examination Report

- (1) Project Name
Production and Sales of Refined Products and Petrochemical Products
- (2) Project Site
Vietnam Thanh Hoa Province
- (3) Project Outline
Production and Sales of Refined Products and Petrochemical Products
- (4) Category Classification
Category : A
- (5) Reason for Classification
This project belongs to sensitive sectors (Petrochemicals, Petroleum Refining, Thermal Power, Ports and Harbors), and is located in or near sensitive areas under Japan Bank for International Cooperation Guidelines.
- (6) Environmental Permits and Approvals
Pursuant to the laws and regulations of the Vietnam, the EIA for the project was prepared for submission, and the environmental permit was issued by the Ministry of Natural Resource and Environment on September 16th, 2010 with some conditions attached. The project company will take appropriate measures to satisfy those conditions.
- (7) Pollution Mitigation Measures
Air quality, water quality, waste, noise and vibration are planned to be properly managed in accordance with local standards.
- (8) Natural Environment
The project site is not located in the protection areas under the national law or international conventions. Since habitats of few rare species and coral reefs exist in the area near the project site, appropriate measures are planned to be taken such as minimizing the cutting area, selecting the proper mooring and route of crude oil

pipeline, and minimizing the amount of warm drainage.

(9) Social Environment

Although the project involves involuntary resettlement, the government authority properly implemented this resettlement under laws and regulation of Vietnam. For Additional involuntary resettlement, the project company is planning to cooperate with the government authority to work out Resettlement Action Plan and local public hearing.

The project also involves cemetery relocation, the government authority is planning to properly implement this relocation under laws and regulations of Vietnam.

(1 0) International Standard

World bank/IFC Performance Standards

(1 1) Others, Monitoring

In this project, monitoring will be conducted for Environmental Permits, air quality, water quality, noise, land acquisition, resettlement and cemetery relocation.
