

Environmental Examination Report

(1) Project Name

Manufacturing of Acrylic Acid

(2) Project Site

Indonesia

Cilegon city, Banten

(3) Project Outline

Manufacturing of Acrylic Acid

(4) Category Classification

Category A

(5) Reason for Classification

The project falls on manufacture and transport of toxic or poisonous substances regulated by international treaties as listed in the JBIC Environmental Guidelines.

(6) Environmental Permits and Approvals

As the local regulation, The Environmental Impact Assessment is not needed to prepare or get approval of the environmental authority. The Environmental Management Plan and the Environmental Monitoring Plan (UKL/UPL) made by the project entity have been already approved with no strings by the environmental authority of Cilegon city in Indonesia

(7) Pollution Mitigation Measures

Planned values of Dust (PM) of emission gas comply with local standards and almost complies with international standards. Planned value of air (other than PM), water and noise quality complies with local standards and international standards.

(8) Natural Environment

The project site is not located in the nationally designated nature protection areas nor are there any area nearby where environmental considerations are called for. The project site does not encompass the habitats of nationally protected endangered species.

(9) Social Environment

It is confirmed that there is no involuntary resettlement and site acquisition coming from

implementation of Project.

(1 0) Others, Monitoring

In the project, the air quality of Dust (PM and TSP) will be monitored for a certain period after beginning of operation.
