

Environmental Examination Report

(1) Project Name

LNG Project in Australia

(2) Project Site

Australia Western Australia

(3) Project Outline

Development of gas field and production and sales of liquefied natural gas (LNG)

(4) Category Classification

Category A

(5) Reason for Classification

The project site is located in or near sensitive areas and the project has sensitive characteristics and falls into the oil and natural gas development/pipelines/oil, gas and chemical terminals/ports and harbors sectors.

(6) Environmental Permits and Approvals

Environmental permits and approvals have already been obtained from relevant authorities.

(7) Pollution Mitigation Measures

It is confirmed that atmospheric emissions, liquid wastes, material wastes, noise, vibration and ecosystem are properly managed.

(8) Natural Environment

It is confirmed that measures for the protection of natural environment are properly managed.

(9) Social Environment

It is confirmed that the relocation of residents does not occur in the project site and no special social considerations should be required.

(10) Others, Monitoring

Monitoring for compliance of the approval conditions, necessary permits/approvals for future development phase and any claims from relevant authorities regarding ecosystems.
