

Environmental Examination Report

(1) Project Name

Construction of Deep Conversion Complex Project

(2) Project Site

Republic of Kazakhstan, Atyrau

(3) Project Outline

Installation of 12 new units including FCC, and the expansion of existing utilities & offsite facilities.

(4) Category Classification

Category A

(5) Reason for Classification

This project falls into the petroleum refining sector under the Environmental Guidelines and this project also has sensitive characteristics.

(6) Environmental Permits and Approvals

EIA report for the project was approved by the Ministry of Environment Protection on October 17, 2011.

(7) Pollution Mitigation Measures

The emitted concentrations for air quality, water quality, and noise levels are expected to meet the local standards and the IFC/World Bank standards.

(8) Natural Environment

The project site is not located within the protected area designated by the host country's government, nor are there any areas nearby where environmental considerations are called for. It has been confirmed that the project site does not encompass the habitats of nationally protected endangered species.

(9) Social Environment

It is confirmed that resettlement plan will be made, and appropriate measures will be taken for the people affected by the project.

(1 0) Others, Monitoring

Monitoring for water quality and resettlement will be conducted.
