

Environmental Examination Report

(1) Project Name

Natural gas projects in Canada

(2) Project Site

Canada / British Columbia

(3) Project Outline

Natural gas development

(4) Category Classification

Category A

(5) Reason for Classification

The project falls into the oil and natural gas development sector under the Environmental Guidelines. This project also has sensitive characteristics.

(6) Environmental Permits and Approvals

Environmental permits and approvals for existing wells have already been obtained from relevant authorities. Such permits and approvals for wells to be drilled and for the related gas facilities to be constructed or refurbished will be obtained from relevant authorities.

(7) Pollution Mitigation Measures

It is confirmed that atmospheric emissions, liquid wastes, material wastes, noise and ecosystem are properly managed.

(8) Natural Environment

It is confirmed that measures for the protection of natural environment are properly managed.

(9) Social Environment

It is confirmed that the relocation of residents does not occur in the project site and no special social considerations should be required.

(1 0) Others, Monitoring

Monitoring for permits and approvals for wells to be drilled and any accidents or breach of environmental legislations will be conducted.
