

Environmental Examination Report

- (1) Project Name
Scattered transmissions and substations project
- (2) Project Site
Jakarta, the Republic of Indonesia
- (3) Project Outline
Supplying and installing equipments for establishment and extension of substations and transmission lines
- (4) Category Classification : B
- (5) Reason for Classification
The project does not belong to sensitive sector, does not include sensitive characteristics and is not located in or around sensitive areas under the Guidelines; therefore it is likely to have no significant adverse impact on the environment.
- (6) Environmental Permits and Approvals
It is confirmed that approvals for the environmental and social considerations have been acquired from the relevant authorities. Meetings with inhabitants have been held to give adequate explanations.
- (7) Pollution Mitigation Measures
Noise and wastes, which are considered to have potential impacts during construction phase, are confirmed to be properly managed.
- (8) Natural Environment
The project site is not located within the protected area designated by the host country's government or international treaties and conventions, nor are there any areas nearby where environmental considerations are called for. It is confirmed that there are no habitats of rare species living within the project site.

(9) Social Environment

It is confirmed that there is no land acquisition and involuntary resettlement caused by project implementation and there is no issue for which special social considerations are required.
