

Environmental Examination Report

(1) Project Name:

Port expansion and development project

(2) Project Site:

Kocaeli and Bursa, Turkey

(3) Project Outline:

Expansion of an existing port and development of a new port

(4) Category Classification:

A

(5) Reason for Classification:

The project falls into a sensitive sector (the ports and harbors sector).

(6) Environmental Permits and Approvals:

With regard to the port expansion project, the Environment Impact Assessment (EIA) on the project was not required under the Turkish laws and regulations. The Project Information File which is required under the Turkish laws and regulations instead of the EIA for this project was submitted and approved on August 2009.

With regard to the port development project, the EIA on the project was submitted in compliance with the Turkish laws and regulations and the environmental permit was approved on August 2012.

(7) Pollution Mitigation Measures

Air quality, water quality, waste, noise and vibration of natural environment are properly managed in both projects.

(8) Natural Environment

It is confirmed that measures for the protection of natural environment are properly managed in both projects.

(9) Social Environment

Appropriate measures for local residents who will be affected by the project are under consideration in both projects.

(10) International Standard

World Bank – Safe Guard Policy

(11) Result of Environmental Review:

Taking the above environmental review into consideration, JBIC will monitor noise and results of monitoring in both projects.
