New Reporting Standards

The West Virginia Department of Environmental Protection (WVDEP) Division of Mining and Reclamation application fees change June 16, 2011.

Effective June 16, 2011:

- Notice of Intent to Prospect (PRO) \$2,000.00, regardless of tonnage.
- Surface Mine Application (SMA) \$3,500.00.
- Dam Control Application (DAM) \$300 application fee. (Fee applies to each dam certificate to be issued for new, modification, abandonment, or transfer categories.)
- Permit Revision (REV) \$2,000.00, if significant.
- Incidental Boundary Revision (IBR) \$2,000.00, if significant.
- Permit Renewal (RNW) \$3,000.00, if Quarry \$500.00.
- Permit Amendment (AMEND) \$2,550.00.
- Permit Transfer (19A) \$1,500.00 per permit, Quarry \$500.00 per permit.
- Operator Assignment (19) \$1,500.00 per permit.
- Inactive Status (INA) \$2,000.00, Quarry is free.
- Coal Removal for Construction Purposes (4C) \$3,500.00, paper application.

The West Virginia Department of Environmental Protection (WVDEP) Division of Mining and Reclamation has implemented the following new reporting standards.

Effective January 1, 2009:

- The new eMap file should conform to the WVDEP eMap standards and be attached in the "Maps and eMap Data Section" toward the end of each application. See documentation in that section.
- The "Maps and eMap Data Section" should generally contain, where appropriate, the proposal, drainage, and subsidence control maps along with the eMap. Please attach other drawings and maps in the specific section where they are discussed.
- DO NOT refer to any information existing only in another application, please provide the information in this application.

C-10: Sample DEP News Advertisement

Expiration Date: 09/23/2015

In Section Z, include a completed copy of DEP's sample newspaper advertisement that will be used to give public notice of intent to mine.
DO NOT attach an advertisement here - provide it in Section Z.
Check below the special items which have been included in the public notice of intent to mine:
Mining within 100 feet of the outside right-of-way of a public road.
*Relocation or closure of a public road.
Land Use Change.
NOTE: Certification of publication must be submitted within four weeks after last date of publication.
*Requires permission from the authority with jurisdiction over the public road.
D-1: Certificate of Insurance
D1. Include a current Certificate of Insurance:

Instructions: Bonding Instructions

Policy Number: 013811408R3

Complete Bond Calculation Tables (D-2 Table 1-4) for each mining category applicable within the site boundary. It is **very important** that you complete this section in sequence they appear in the menu.

For Loadout Only and Haulroad Only sites, you do not need to complete a Bond Calculation Table.

Upon completion of the tables, you are ready to complete the General Bonding Section. Here you will break the site down by increment(s) and mining categories. You will see 3 additional options here that you do not have a direct Bond Calculation table for: EPZ Fill, contemporaneous reclamation waiver, and haulroad only. These are only available at this level, to properly reflect the override in rate from the tables.

If any of the tables are **changed after** the General Bonding Section and Bond Totals sections have been visited, you will need to open these pages in sequence and mark the section as incomplete and save the pages. This allows them to repopulate with the newest information and redo the calculations in these pages.

For Renewal applications:

Change in Bonding Method is allowed: full to incremental and incremental to full. Here again, complete Tables then go to General Bonding Section. When this page opens, before you start to make any changes, look down at your list of increments, their acres and mining category breakdowns. If any of this information is incorrect or missing (mining category breakdowns with acres) contact DEP and have this resolved. Once the information is updated in ERIS, DEP internal system, you will need to RESET this page to bring over the newest information. Double check the information after the reset and repeat if necessary.

F_1 · I	Prime	Farmi	land l	Inform	ation

F-1.	Did the applicant's reconnaissance inspection or soil survey indicate that all or any part of the proposed
	permit area is prime farmland? Yes No
	If Yes, submit a soil survey to confirm the exact location of such lands. <i>Identify</i> survey as <i>Attachment F-1</i> and delineate the area of prime farmland on the PROPOSAL MAP.
	If No, provide the basis for this response by checking the item(s) that apply: No land within the proposed permit area has been historically used for cropland.
	The slope of all land within the proposed permit area is ten percent (10%) or greater.
	Other factors (i.e., rocky surface, frequent flooding) disqualify the land as prime farmland.
	A qualified person other than the applicant has conducted a soil survey and determined in writing that no prime farmland is present. Identify this determination and provide results of the soil survey. Identify as Attachment F-1.

F-2: Existing Land Use Information

F-2. Indicate the existing land uses within the proposed permit area:

NOTE: If you selected "Previously Mined and Not Reclaimed", then delineate on PROPOSAL MAP those areas that were previously mined and not reclaimed.

Primary	Secondary	Land Use Name	Action
		Forestland 🗸	New
0	•	Hayland or Pasture	New
0	•	Rangeland	New
0	•	Previously Mined and Not Reclaimed	New

F-3: Land Use Change Informatio	n

i O. Lana	Ose Onange information	
F-3.	Has there been a land use change during the five (5) years preceding the date of this application?	
	○ Yes No	
	If Yes, describe the historic land use:

G-2: Histo	ric Places and Archa	aeological Site Protection Informatio	on							
G-2.	Describe any cultura Places and any kno	al or historic resources listed, or eligible wn archaeological sites within the prop	e for listing on the posed permit area	and adjacent areas. Include a						
	description of the m	easures to be taken to protect these re	esources. <i>Identity</i>	as Attachment G-2. If None,						

G-3: State Historic Preservation Officer Information

- G-3. The applicant shall provide to DEP, as a separate package, the following information for the State Historic Preservation Officer (SHPO) review and subsequent response:
 - A. Two topographic maps of the proposed mining site and surrounding area;
 - 1. One at a scale of 1" to 500' color coded to show the boundaries and extent of the proposed surface mining operation; and
 - 2. One at a scale of 1" to 2000' to show boundaries of the proposed surface mining operation.
 - B. Photographs of any structures (excluding trailers and temporary buildings, any structure built within the past twenty-five years, and equipment) situated on the proposed mining operation and directly adjacent to the operation; and
 - C. A statement of the conditions of the proposed surface mining operation with particular attention given to any known historic, cultural, or archeological resources.

Identify as Attachment G-3.

See Attachment G-3

H-1: Fish and Wildlife Information

H-1. Provide fish and wildlife resources information for the proposed permit and adjacent area. Give a general overview for these areas including but not limited to habitat and forest cover types; physiographic region; common, unique, or important game and other indigenous plant and animal species. *Identify as Attachment H-1*.

See Attachment H-1

H-2: West Virginia Division of Natural Resources Wildlife Resources Section

H-2 Attach the West Virginia Division of Natural Resources, Wildlife Resources Section, Wildlife Lands Inquiry Response application letter and corresponding response.

Identify as attachment H-2.

The West Virginia Division of Natural Resources response has been attached.

H-3: Site Specific Habitats or Species of Concern

H-3. Provide site-specific resource information necessary to address the respective habitats or species of concern if any, identified on the Wildlife Lands Inquiry Response. *Identify as attachment H-3*.

The Wildlife Resources Lands Inquiry Response from the West Virginia Division of Natural Resources has been included in Section H-2. All runoff from the proposed operation will be routed through sediment structures which will be monitored by the storm water requirements of the National Pollution Discharge Elimination System (NPDES) Water Pollution Control Permit which will diminish any adverse effect from occurring to the watershed as a result of this mining operation.

H-4: Endangered Species Act

H-4. Provide information at the site-specific level regarding endangered species and their habitats. Attach the applicant's initial application/notification letter to the West Virginia Department of Environmental Protection pertaining to the site-specific endangered species consultation relative to the proposal. (See permit handbook, section 27-4 for guidelines and applicability.) Attach the corresponding West Virginia Department of Environmental Protection response. In chronological order, continue to provide any further related documentation, determinations, correspondence, or related studies (e.g. bat survey, if applicable) up to and including completion/closure of consultation with the West Virginia Department of Environmental Protection. *Identify as attachment H-4*.

The Endangered Species Consultation closure letter has been attached.

H-5: Disturbance and Adverse Impact Information

or will al values d during ation, cplaining
ed, or
Total
A
the dentify

I-4: Coal Processing Refuse Disposal Information

If Yes, complete Coal Ash Utilization Form (MR-36) for each source.

I-4.	Is coal processing refuse disposal proposed?
	If Yes, provide overburden analysis to show its chemical properties. Use Attachment I-4.
	See Attachment O-8
	333 / Masimio N 3 3
l-5: Dura	ble Rockfill(s) Information
I-5.	Are durable rockfills proposed?
	○ Yes No
	If Yes, provide slake durability analysis. Use Attachment I-5.
I-6: Geo	ogic Information Waiver Request
I-6.	Does the applicant request a waiver of the requirement to provide certain geologic information?
	○ Yes No
	If Yes, address A. and B. below:
	ii 163, address A. and B. below.
	A. Check the type of waiver(s) requested:
	Results of test borings as requested in I-11.
	Engineering properties of soft rock for underground mines as requested in I-12.
	B. Provide the specific source of existing equivalent information available upon which the request for
	waiver is based. Identify as Attachment I-6.
	fied Geologic Cross Sections
I-7.	Provide certified geologic cross-sections which include the following: <i>Identify as Attachment I-7</i> .
	A. Nature and depth of the various strata or overburden including geologic formation names and/or
	geologic members as described by the U.S. Geological Survey or other published geologic reports;
	B. Presence of any known structural features such as faults, fractures, anticlines, synclines, and
	monoclines;
	C. Depth of weathering identified during exploration and drilling;
	D. Nature and thickness, in inches, of all coal or rider seams above and immediately below the
	proposed coal seam(s) to be mined;
	E. Nature and thickness of the stratum immediately beneath the lowest coal seam to be mined;
	F. Vertical distribution of aquifers and the name(s) of the stratum (or strata) in which the water is found
	For each aquifer system, show the seasonal fluctuations in head and general water quality
	information. Also, provide appropriate cross-references to the detailed water quality information
	under the baseline ground water information section; and
	G. Denote any potentially acid-producing materials, topsoiling, and durable materials.
	See Attachment I-7 and Drawing Nos. B11-583-M10 and B11-583-M12.

I-8: Certified Geohydrologic Map

- I-8. Provide a certified geohydrologic map identifying the following: *Identify* as Attachment I-8.
 - NOTE: Proposal map can be utilized only if this additional information does not make the map difficult to read.
 - A. Locations (latitude and longitude) and elevation of all bore holes and sampling sites;
 - B. All minerals croplines and the strike and dip of the coal to be mined;
 - C. Existing or previous surface mining limits with their permit numbers;
 - D. Location and extent of known workings of any underground mines and auger mined areas, including mine openings to the surface. Label these openings as to whether they are currently discharging water or are known to have discharged water in the past;
 - E. Areal extent of aquifers with the name(s) of the stratum (or strata) in which the water is found and show the anticipated direction of water movement;
 - F. Location and depth of all oil and gas wells, and their Office of Oil and Gas permit numbers, for all wells which are within the proposed mining limits (surface or underground) and/or within 1000 feet of the proposed permit boundary;
 - G. Presence and attitude of any known structural features such as faults; axial traces of synclines, anticlines, and monoclines; and any recognized fracture patterns of lineament traces;
 - Location of geologic cross-section(s).

See Attachment I-8 and Drawing Nos. B11-583-M10, B11-583-M12 and B11-583-M13.

I-9: Detailed Geologic Description

- I-9. Provide a detailed geologic description of the permit and adjacent areas which include the following: *Identify* as Attachment I-9.
 - A. Stratigraphic and lithologic descriptions of the area to be affected by mining;
 - B. Hydrogeologic setting including the areal and vertical distribution of all aquifers; seasonal differences in head; the name(s) of the stratum (or strata) in which the water is found; and the availability, movement, quality of ground water flow in all aquifer units;
 - C. Structural geology of the coal seam and the strata to be affected by mining both in the permit and adjacent areas, including faults, folds, fracture and lineament traces, and regional and site specific strike and dip;
 - D. Geochemical character of all strata and coal to be disturbed by mining and the potential of this strata for generating acid, alkaline, or iron-laden drainage;
 - E. Depth and degree of weathering of area strata and the effects this weathering has on the physical and geochemical properties of the overburden proposed for disturbance;
 - F. Effects of fracturing and weathering on the extraction of coal and the hydrologic regime;
 - G. Anticipated impacts of all proposed and existing operations on the geology and hydrology of the area, including impacts resulting from multiple seam mining and subsidence;
 - H. For underground mining operations (including auger mining) indicate whether or not there is the potential for gravity discharge(s) and the anticipated quantity and quality of the discharge(s) from each potential discharge site. For non-gravity discharge situations, indicate the potential for seepage along the outcrop barrier and the potential hydraulic head which might result in the underground workings. Indicate if the potential discharge will require chemical treatment.

See Attachment I-9 and Drawing Nos. B11-583-M10, B11-583-M12 and B11-583-M13.

I-10: Geologic Borehole Log

	Provide complete Geologic Borehole Log for all test borings and coreholes in the proposed permit and adjac area.	ent
	This data is to be provided in EQuIS (Environmental Quality Information System) MEDD (Multimedia Electron Data Deliverable) format. Completed MEDDs should be attached to this page.	nic
	Multimedia Electronic Data Deliverables and their templates are available here:	
	When preparing an application for initial submission to DEP you should not attempt to register your site at th point in time with EQuIS. You need to obtain the template files and use them to report the analysis information where you will leave the Site and Sub-Site columns empty. The EQuIS site registration process requires you provide your permit number, which DEP does not issue until your application has been submitted and fees paid. During the review of your application the DEP Reviewer will provide guidance as to when to do the EQ site registration.	on, I
	To reference any existing Geologic Borehole Log Data in EQuIS system, provide the site number, sub-site number and location codes below.

J-5: Seasonal D	Discharge Rate/U	lsage and Water D	epth Informatio	<u>on</u>			

<u>J</u> -	. ე. ა	<u>beasonal discharge Katerosage and Water Depth Information</u>
J-	-5.	Are there significant Aquifers on the proposed permit area, adjacent areas and/or areas over the proposed mineral extraction?
		Yes No
		If Yes, Provide a description to include discharge rates or usage and depth to water under seasonal conditions. <i>Identify as Attachment J-5</i> .
		See Attachment J-5

J-6: Probable Hydrologic Consequences Information

Provide a statement describing the Probable Hydrologic Consequences (PHC) of the Proposed mining operation, with respect to the hydrologic balance, on the permit area, adjacent areas, and over the proposed mineral extraction. The statement must provide the following information: Identify as attachment J-6.

WATER QUANTITY:

- Whether the proposed operation may result in water supply diminution or interruption for any ground or surface water source currently being used for domestic, agricultural, industrial or any other legitimate
- Potential Impact the Proposed operation will have on flooding or streamflow alteration, including channel scoring and dewatering of streams;
- Whether the proposed operation will disturb aguifers that significantly insure water use;
- Potential effects of the proposed operation on ground and surface water availability.

WATER QUALITY:

- · Whether the proposed operation may result in water supply contamination for any underground or
 - surface water source currently being used for domestic, agricultural, industrial, or any other legitimate purpose;
- · Whether acid or toxic forming materials are present which could result in the contamination of surface or ground water
- Potential Impact the proposed operation will have on sediment yield;
- · Potential impacts resulting from increases in total hot acidity, total suspended solids, dissolved solids, and other important water quality parameters.

GRAVITY DISCHARGE/OUTCROP SEEPAGE:

Potential for gravity discharge from the underground workings during and after mining, the potential impacts resulting from the complete failure of the outcrop barrier, and the formation of outcrop seepage faces. (Provide calculations)

See	Δtt	ach	mei	nt	1-6

J-7: PHC indications of Contaminated	<u>, Diminished</u>	<u>, or Interru</u>	<u>pted Ground Water</u>
--------------------------------------	---------------------	---------------------	--------------------------

	es the PHC indicate that a currently used or significant ground water resource is likely to be contaminated,						
dim	111 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1						
diminished, or interrupted?							
○ Yes ● No							
If Y	es, provide the following information. Identify as attachment J-7						
A.	Identify the alternative water source(s) and provide a detailed description of any aquifer, developed or undeveloped, proposed as an alternative water source;						
	 If the alternative source(s) is developed, show the location on the proposal map using designation AW-1, AW-2, etc. If the alternative source(s) is undeveloped, provide proposed plans and specifications. 						
В.	Provide water quality and quantity data demonstrating its suitability for the identified use(s).						
Se	ee Attachment J-7						
	A.						

J	<u>-о: Рп</u>	C indications of Contaminated, Diminished, or interrupted Surface Water
	J-8.	Does the PHC indicate that a currently used or significant surface water resource is likely to be contaminated,
		diminished, or interrupted?
		○ Yes No
		If Yes, provide the flood flows, base flows, and other characteristics to fully evaluate such probable hydrologic
		consequences as water availability and suitability for both the pre mining and postmining land use in order to
		plan remedial and reclamation activities. <i>Identify as Attachment J-8</i>
		See Attachment J-8
	I	

J-9: Request for Waiver of Ground Water Monitoring

J-9.	Is a waiver of ground water monitoring requested?
	○ Yes No
	If Yes, identify each individual water-bearing stratum for which a waiver is requested and demonstrate by use of the PHC determination and other available baseline hydrologic and geologic information that the particular water-bearing stratum is not one which serves or may potentially serve as a significant aquifer or one which ensures the hydrologic balance within the cumulative impact area.
	If No, provide letter(s) of permission to monitor domestic water supplies proposed as Monitoring sites. <i>Identify as Attachment J-9</i>
	NOTE: The ground water and surface water monitoring plans are to be included in Section U of this application.
	See Attachment J-9

J-10: Surface and Ground Water Baseline Monitoring Site Laboratory Data

J-10. Provide copies of original laboratory data sheets for the surface water and ground water baseline monitoring site. *Identify as Attachment J-10*See Attachments J-3B and J-4B

J-11: Hydrologic Reclamation Plan

J-11.

Provide a hydrologic reclamation plan in the form of maps and/or narrative which describes the steps to be taken to minimize disturbances to the hydrologic balance within the permit and adjacent areas; to prevent material damage outside the permit area; to met applicable federal and state water quality laws and regulations; and to protect the rights of present water users. *Identify as Attachment J-11*

The plan shall include:

- A. Preventive and remedial measures to avoid acid or toxic mine drainage;
- B. Measures to assure the protection of the quality and quantity of surface and ground water systems;
- C. Measure to be taken to prevent, to the extent possible, contributions of suspended solids;
- D. Measure to control drainage and, if needed, a description of the water treatment facilities;
- E. Measure to be taken to restore, enhance, protect, or replace the approximate premining recharge capacity (under operations do not need to respond to this subpart);
- F. Measure to be taken to prevent, control, or mitigate the adverse impacts of gravity, seepage, or pump discharges from underground mines and/or augering, if applicable; and
- G. Restore, protect or replace the water supply of present water users in accordance with section 24 of the Act.
- H. Preventive and remedial measures to prevent any other potential adverse hydrologic impacts identified in the PHC.

See Attachment J-11	

Section K: NPDES Information

K-1. A National Pollutant Discharge Elimination System (Article 11/WVNPDES) application (NPD) or modification to an existing NPDES Permit (NPM) must be created as a seperate Electronic Application.

	B. Provide a detailed narrative to describe the major mining and reclamation activities of each the Proposed operation. The narrative shall also address the following: <i>Identify as Attachm</i>	phase of nent N-1.
	 Consideration which was given to maximize the utilization and conservation of the solid fu being recovered so that re-affecting the land in the future will be minimized; 	uel resource
	 Appropriate steps which will be taken to comply with applicable air and water quality laws regulations and applicable health and safety standards; 	and
	 Fugitive dust control plan to be employed during site preparation, mining and reclamation required, provide an air quality monitoring program and locate monitoring station(s) on pre- 	
	How topsoiling materials will be removed, stored, stabilized, protected, and redistributed;	
	Include Phase Map(s) drawn to scale which indicates the sequence for each phase.	
	See Attachment N-1B	
N-2: A	ditional Mining Permits for Connected Operation(s)	
N-2.	Are other operations anticipated in connection with this proposed operation which will require a surface coal mining permits? Yes No If Yes, Identify the lands subject to surface mining and the size, sequence and time of the oper	
	as Attachment N-2. Applications for a deep mine and preparation plant will be submitted	
N-3. S	Is surface mining and/or augering to occur within 500 feet of an underground mine? Yes No If Yes, Complete the following: A. Indicate the status of the underground mine: Abandoned Active Temporarily Inactive Explain Below B. Provide the following information. Identify as Attachment N-3 Office of Miner's Health, Safety and Training approval and subsequent MSHA A Approval of the underground operator and/or owner; and A description of impact of this proposed operation upon underground mining.	Approval;
N-4: T	Provide a description of the measures to be used for the temporary storage and final disposa as grease, lubricants, paints, flammable liquids, garbage, abandoned machinery, timber, brus chemicals (flocculents, pH adjusters, coal processing, etc.), and other combustibles generate mining activities. Identify as Attachment N-4 Waste generated by this operation, including grease, lubricants, paints, flammable liquids, garbage, abandoned machinery, mine timbers, timber brush, treatment chemicals, or other combustible materials, will not be buried or permanently disposed of on site. Oil products and by-products shall be stored in watertight containers until they can be picked up by an approved waste management company for disposal off site. Merchantable timber may be sold. Brush that is cleared from the site shall be burned in accordance with local laws and regulations. Note: Identify all temporary and permanent storage and/or disposal sites on the PROPOSAL PLAN MAP	sh, treatment ed during the

<u>N-5: Ur</u>	<u>nderground Mining Boundary Information</u>
N-5.	Has underground mining occurred within the boundaries of the proposed permit area?
	Yes
	If Yes, provide a description of the potential effects subsidence may have on structures such as dams, coal
	waste disposal areas, fills, and other such structures. Identify as Attachment N-5
	See Attachment N-5

O-'	1:	Surface	Config	guration	Cross	Section	De	piction

- O-1. Provide cross-sections depicting the surface configuration prior to mining, during mining, and following reclamation. Cross-sections shall identify the following:
 - A. All materials requiring special handling;
 - B. Coal seams to be mined;
 - C. Topsoiling material; and
 - D. Permit Boundary.

Identify as Attachment O-1.

See Drawing No. B11-103-E4 entitled "Sections A-A and B-B"

O-3: Backfilling and Regrading Requirements Compliance Information

O-3. Provide a description of how the operation will comply with backfilling and regrading requirements.

Identify as Attachment O-3.

GENERAL BACKFILLING AND GRADING PLAN

Revegetation will be kept current by establishing a permanent vegetative cover on final slopes by the end of the second growing season. Operable grading equipment will be kept on the permit area or adjacent permits until satisfactory completion of grading unless otherwise approved by the Director.

The operator shall establish on all graded areas and all other disturbed areas a diverse, effective and permanent vegetative cover of the seasonal variety native to the area, or introduced species that are compatible with the approved postmining land use. This established vegetative cover shall be capable of stabilizing the soil from erosion, regeneration and plant succession. At a minimum, a temporary or permanent vegetative cover shall be established by the end of the first growing season and a permanent vegetative cover shall be established by the end of the second growing season.

TIME SCHEDULE FOR REGRADING AND BACKFILLING

Grading will be completed as contemporaneously as practicable with mining operations and as reflected on the approved refuse and reclamation plan. Provided, however, that reclamation activities shall be initiated within thirty (30) days, and final grading shall be initiated within one hundred eighty (180) days of completion of operations. Should site conditions or weather make adherence to these guidelines impractical, the period of time required to be current may be reasonably extended by the director.

COMPLIANCE WITH BACKFILLING & GRADING TIME LIMITS

O-4: Delay of Contemporaneous Reclamation Variance Request

O-4.		variance for delay of contemporaneous reclamation requested? Yes No
		s, provide the following information. E: If Yes and approved by DEP, bond rate is \$5,000 per acre.
	A.	From which standard(s) is variance sought? (i.e., acreage, time and/or distance limits)
	В.	For each standard from which a variance is sought, state a specific alternative limit of the same type.
	C.	A narrative statement supported by documentation and sound scientific and/or engineering data that describes and demonstrates on the basis of site-specific conditions that compliance with the standard(s) is technologically and economically infeasible.
	D.	A sequential plan showing all phases of mining and reclamation, including specific time frames for completing each phase. The plan must describe at what point reclamation operations will commence and how such operations will advance in relation to mining operations throughout all proposed operations.
	E.	Describe any environmental impacts that may result from the delay in reclamation;
	F.	Identify on the PHASE MAP the specific surface areas for which a variance is requested
	Iden	tify as Attachment O-4.

O-5: Approximate Original Contour (AOC) Variance Reques	O.	-5: A	٩þ	proximate	Original	Contour	(AOC) Variance	Rec	quest
---	----	-------	----	-----------	----------	---------	------	------------	-----	-------

<u>U-5: Appro</u>	oximate	<u>: Original Contour (AOC) variance Request</u>
O-5.	ls a v	variance from approximate original contour (AOC) being requested for:
	A.	Remined Areas Yes No If Yes, provide the following information: • A demonstration that the volume of reasonably available spoil is insufficient to completely backfill the reaffected or enlarged highwall; • A demonstration that any highwall remnant left after mining will be stable and not pose a hazard to the public safety or the environment.
		Identify as Attachment O-5 - Remined Areas.
		NOTE: If Yes, attachment is required.
	1	

В.	 Steep Slope Areas Yes No If Yes, provide the following information: Alternate postmining land use request (Complete F-4 of this application); The proposed postmining land use of the affected land is limited to industrial, commercial forestry, cropland, residential or public (facility) use; All highwalls will be completely backfilled in a manner that results in a static safety factor of 1.3; Only spoil not necessary to achieve the postming land use may be removed from the mine bench; The watershed of the permitted and adjacent areas will be improved by reducing pollutants, environmental impacts or flood hazards; provided that, the watershed will be deemed improved only if: The amount of total suspended solids or other pollutants discharged to ground or surface water from the permit area will be reduced, so as to improve the public or private uses or the ecology of such water, or flood hazards within the watershed containing the permit area will be lessened by reduction of the peak flow discharge from precipitation events or thaws; and The total volume of flow from the proposed permit area, during every season of the year, will not vary in a way that adversely affects the ecology of any surface water or any existing or planned use of surface or ground water; Appropriate federal, state, and local government agencies were provided an opportunity to comment on the proposed postmining land use and deemed it to be an equal or better
	 economic or public use; The plan is designed and certified by a registered professional engineer to assure stability, drainage, and configuration necessary for the intended use of the site; The surface landowner requested in writing that a variance be granted to achieve the approved alternative postmining land use; The alternative postmining land use requirements are met; All other applicable requirements of the Act and regulations, except for those relating to AOC, are met. Identify as Attachment O-5 - Steep Slope Areas. NOTE: If Yes, attachment is required.
C.	Mountaintop Removal Areas
	 Alternate postmining land use request (Complete F-4 of this application); The proposed postmining land use of the affected land is limited to industrial, commercial forestry, cropland, residential or public (facility) use; The proposed use constitutes an equal or better use compared with the premining use; The proposed use will be compatible with adjacent land uses and existing state and local land use plans; County commissions and other state and federal agencies were provided an opportunity to review and comment on the proposed land use; The application contains a specific plan and assurances that the proposed postmining land use will be: Compatible with adjacent land uses; Practicable with respect to financing and completing the proposed use; Supported by commitments from public agencies where appropriate; Planned pursuant to a schedule attached to the reclamation plan so as to integrate the mining operation and reclamation with the postmining land use; Designed by an approved person to assure the stability, drainage, and configuration necessary for the intended use of the site; and Obtainable according to data regarding expected need and market. All other requirements of the Act will be met.
	 Alternate postmining land use request (Complete F-4 of this application); The proposed postmining land use of the affected land is limited to industrial, commercial forestry, cropland, residential or public (facility) use; The proposed use constitutes an equal or better use compared with the premining use; The proposed use will be compatible with adjacent land uses and existing state and local land use plans; County commissions and other state and federal agencies were provided an opportunity to review and comment on the proposed land use; The application contains a specific plan and assurances that the proposed postmining land use will be: Compatible with adjacent land uses; Practicable with respect to financing and completing the proposed use; Supported by commitments from public agencies where appropriate; Planned pursuant to a schedule attached to the reclamation plan so as to integrate the mining operation and reclamation with the postmining land use; Designed by an approved person to assure the stability, drainage, and configuration necessary for the intended use of the site; and Obtainable according to data regarding expected need and market. All other requirements of the Act will be met.

D. Identify on the PROPOSAL MAP the specific surface areas for which a variance is requested.

 - C. Complete and accurate design and construction specifications;
 - D. Sequence or timetable for construction in relation to the disturbed area to be controlled;
 - E. Operation and maintenance procedures, including methods and location for disposal of the sediment and/or sludge;
 - F. Timetable and plans to remove each structure, including permanent structures;
 - G. Drainage control for all regraded areas;
 - H. Engineering techniques used in design of structures; and
 - I. Certification and periodic inspection procedures.

NOTE: Design plans, cross-sections, and profiles of engineered structures must be based on mapping or surveying data of adequate detail and accuracy. The registered professional engineer or licensed land surveyor certifying design of such facilities is responsible for insuring such adequacy.

Identify as Attachment P-7.

See Attachment P-7

P-8.	Temporary	/ Drainage	Control	Structurels) Information
г-о.	i c ilibulai v	, Diailiaut	COILLIO	Julciuleis	, illiolillatioli

- P-8. Provide the following information for each **temporary** drainage control structure:
 - A. Description, location map, plan view, profile, and cross sections of the structure;
 - B. Complete and accurate design and construction specifications;
 - C. Sequence or timetable for construction in relation to the disturbed area to be controlled;
 - D. Certification and periodic inspection procedures.

Identify as Attachment P-8.

N/A

P-9: Component Drainage Table

P-9. Complete the following table:

Drainage Structure	Drainage Area(s)	Total Acres	Disturbed Acres	Required Volume Acre- Feet	Designed Volume Acre-Feet
Pond No. 1	P-1	152.16	119.3	14.9	15.14
Pond No. 2	P-2, P-2A and P-2B	83.63	39.8	4.8	5.16
Pond No. 3	P-3 and P-3A	91.85	82.6	10.33	10.81
Pond No. 4	P-4	49.36	46.3	5.85	6.64

P-10: Required Water Treatment Facilities Information

P-10.	Will w	vater treatment facilities, other than sediment control, be required? Yes No
	If Yes	s, include the following:
	A.	Design, plans and schedule for treatment during and after mining;
	В.	A description of the treatment unit and settling facilities;
	C.	Reagent;
	D.	Operation and maintenance procedures, including methods and location for disposal of sludge; and
	Б. Е.	Certification and periodic inspection procedures.
	laenti	ify as Attachment P-10.
		· · · · · · · · · · · · · · · · · · ·
	☐ Y	sions of the West Virginia Dam Control Act and/or the MSHA regulations? Solve No Sol
Q-1: Prim	arv Road((<u>s) Plans and Specifications</u>
Q-1.		le plans and specification for each primary road to include the following;
	A.	Design drawings, plan view, map, construction specifications and cross sections;
	B.	Road width, gradient, and surfacing materials;
	C.	Fill embankment and road cut;
	D.	Culverts, bridges, and low-water crossing;
	E.	Drainage ditches and structures;
	F.	Operation and maintenance procedures;
	G.	Certification and periodic inspection procedures; and
	H.	Abandonment and/or removal plan.
		fy as Attachment Q-1. Attachment Q-1
Q-2: Infre Q-2 .		sed Access Road Information le the following for each infrequently used access road:
	A.	Operation and maintenance procedures;
	B.	Drainage control measures; and
	C.	Abandonment and/or removal plan.
	<u> </u> dentif	fy as Attachment Q-2.

U-2: Ground Water Monitoring Plan

U-2.	Provide a ground water monitoring plan to include the following, if applicable:		
	A. Monitoring site locations;		
	B.	Quality and quantity parameters; and	
	C.	Sampling and reporting frequency.	

U-2: Ground Water Analysis

<u>U-3: Surface Water Runoff Monitoring Plan</u>

U-3. Provide a surface water runoff monitoring plan to include the following:

- A. Monitoring site locations;
- B. Quantity parameters; and
- C. Sampling and reporting frequency.

V-1: Coal Processing Refuse Disposal?

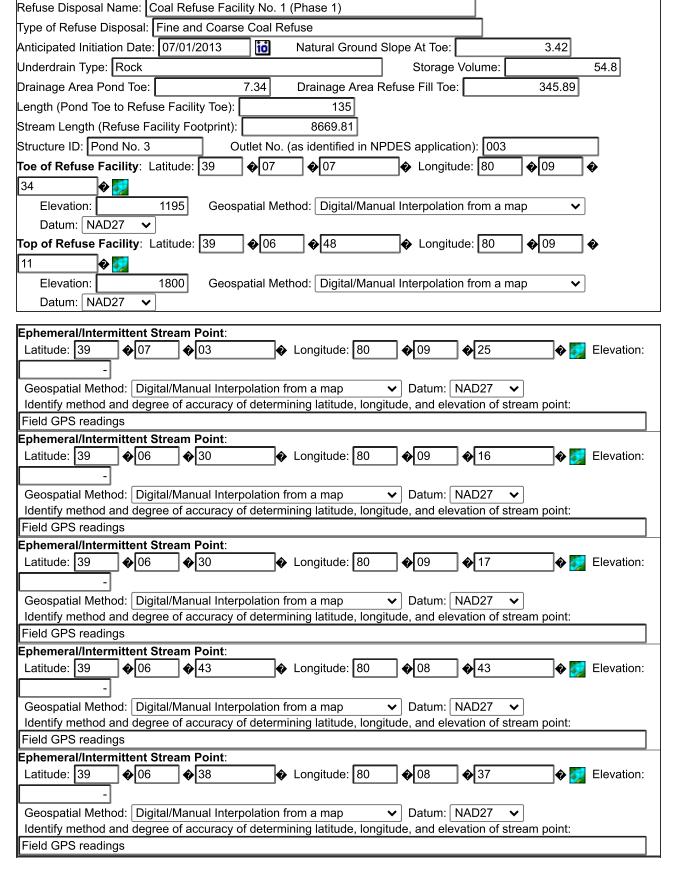

V-1. Is coal processing refuse disposal proposed?

Pes No

If Yes, complete items V-2 through V-4. .

V-2: Coal Processing Refuse Disposal Structure Location

V-2. Provide the following information for each structure and delineate each structure on the PROPOSAL and DRAINAGE MAPS:

V-3: Coal Processing Refuse Disposal Structure Details

V-3.	Prov	Provide the following information for each coal refuse disposal structure:				
	A.	Plan view, profiles and cross sections drawn to scale:				
	В.	A detailed narrative of:				
		 Identification, duties, responsibilities, and lines of communication of the person(s) responsible for the design and construction; Clearing, grubbing and disposal of excess materials resulting from clearing; Construction of underdrains and source of underdrain rock; Type and source of materials to be placed in the disposal structure; Construction sequence; Construction methods including transportation, placement and compaction of materials; Surface protection and maintenance; Potential for liquefaction and safeguards to prevent liquefaction; Monitoring plan to include installation and type of equipment; Abandonment plan; and Certification and periodic inspection procedures; 				
	C.	Geotechnical investigation to include:				
		 Depth to bedrock and character of bedrock; Number, location, and depth of foundation borings or test pits, and the log of each. Indicate the location on the PROPOSAL MAP; Survey identifying all springs, seepage and ground water flow observed or anticipated during wet periods; and Technical description of the rock materials to be utilized in rock underdrains, including durability tests. 				
	D.	Hydrologic and hydraulic designs to include:				
		 Calculations, specifications, and drawings for diversion ditches; and Calculations and engineering assumptions considered in the design of the underdrain; 				
	E.	 Stability analyses addressing both static and dynamics loading conditions to include: Documentation and rationale used to determine cohesion (c), friction angle (�) and density of foundation materials; Documentation and rationale used to determine cohesion (c), friction angle (�) and pore pressure ratio (phreatic surface) of coal refuse; and Results of stability analyses.

Section W: Underground Disposal Plan

W-1.	Is underground disposal of sludge, coal refuse, or slurry proposed? ◯ Yes ⊚ No					
	If Yes	s, provide a description of the following:				
	A.	Method of disposal to include the source of transport medium;				
	B.	Percent of mine void to be filled (include mine maps);				
	C.	Location of active workings to include plans, specifications, and methods of constructing underground retaining walls;				
	D.	Potential areas of breakout;				
	E.	Effects of subsidence;				
	F.	Location of permanent monitoring wells or monitoring stations;				
	G.	Gradient of mine from the backfill area;				
	H.	Stratum underlying the mined coal;				
	I.	Source and quality of material being disposed;				
	J.	Treatment of discharged water;				
	K.	Contingency plan to address blowouts; and				
	L.	If applicable, MSHA Approval.				
	Ident	tify as Attachment W-1.				

Applicant's Certification of Application

Certification of Application

NOTE: If signer is other than President or Vice President, provide a current certified copy of Power of Attorney or Resolution of Board of Directors which grants signer the legal authority to represent the Applicant.

I, **Kevin J. Bealko** (type name), having been duly sworn,

depose and attest that all the representation contained in this application (and in the Centralized Ownership and Control File, where applicable) are true and correct to the best of my knowledge and belief, including ownership and control and violation history, and that I am a principal officer (*President, Vice President*) of the Applicant and that this application has been executed by the persons required by law. I further acknowledge that any information provided or omitted herein for the purpose of defrauding or misleading the West Virginia Department of Environmental Protection may result in the institution of criminal or civil charges and/or other enforcement actions pursuant to applicable state laws.

eMaps: Maps and eMap Data Section

This section is to attach, where appropriate, the proposal, drainage, and subsidence control maps along with the eMap. Click the 'Attachments' button at the top right.

The eMap file is used by WVDEP to update the GIS database. It will prevent errors in representing the applicant's permit features that arise from manually georeferencing and digitizing scanned images of permit maps. It also will reduce misrepresentation due to data being out of date.

- 1. This file should contain a subset of features found on proposal/drainage and subsidence control plan maps.
- 2. A file is only required for actions that also require a proposal/drainage map, renewal/progress map, final map, or subsidence control plan map.
- 3. Applicants should use the available CAD templates for DWG files, or follow instructions for creating shapefiles or a personal geodatabase.

The eMap file for this application should conform to the WVDEP eMap standards as defined at the following location:

eMap Standards Requirements

WVDEP eMap AutoCAD Templates are available at the following locations:

Template files for North Zone

Template files for South Zone

A free dwg file viewer can be downloaded from the following location: (Click the "Download Now" button)

Free Autodesk DWG viewer

For any questions about the eMap file or standards, please contact:

Nick Schaer(Email: Nick.A.Schaer@wv.gov (mailto:Nick.A.Schaer@wv.gov) Phone: 304-926-0499 ext 1510) Mike Shank(Email: Michael.C.Shank@wv.gov (mailto:Michael.C.Shank@wv.gov) Phone: 304-926-0499 ext 1620)
