Address of the project site : Pike County, OH

Q2. Please provide a brief explanation of the project.

Major energy infrastructure initiative to build and operate up to 9.2 gigawatts (GWs) of natural gas-fired power generation in and around Pike County, Ohio. It will be developed and built across approximately 2,000 acres comprising private land and additional land parcels within and proximate to the former Portsmouth Gaseous Diffusion Plant (the PGDP Site). Collectively it would form an integrated platform capable of supplying reliable, large-scale, dispatchable energy to next-generation artificial intelligence (AI) and high-performance computing (HPC) data centers.

- Other ( )

If "Not Required", please disregard Q5. Please go to Q6.

Q5. If environmental and/or social impact assessments have been conducted, have they been approved in accordance with the environmental and social impact assessment system of the country where the project will be implemented? If so, please also specify the date of the approvals and the name of the authorities.

- Approved (without condition(s))
- Approved (with condition(s))
- Under approval process
- Other ( We are in the planning phase of our environmental assessment. Since the exact location of the gas turbines is not finalized yet, we do not have any environmental permit package prepared. However, we have mapped out the process and are ready to submit when necessary. )
