Construction of 400 MW gas turbine power plant in Serdarabat district of Lebap province in Turkmenistan is component of the regional project of interconnection of grids of Turkmenistan and Afghanistan. 3 units of M701DA gas turbines with plant output of more than 400MW (ISO condition) will be installed. This will allow production of up to 3 billion kWh of electricity a year. Part of it will go for export to Afghanistan, other used locally. Construction of 220/110 kV substation is also included in scope of work. The gross demand for land for the project is estimated at around 15 hectares. Execution of ESIA is required for this type of projects.
