

Applicant: NORTH CENTRAL RESOURCES, LLC Reference ID: North Central Resources No. 1 (Deep Mine) (B10-548-1800) (02/06/2012)

Status: ERIS - Closed - Issued

Type: Surface Mine Application #1 Permit ID: U201512 Printed: Oct. 27, 2020 10:06 AM

New Reporting Standards

The West Virginia Department of Environmental Protection (WVDEP) Division of Mining and Reclamation application fees change June 16, 2011.

Effective June 16, 2011:

- Notice of Intent to Prospect (PRO) \$2,000.00, regardless of tonnage.
- Surface Mine Application (SMA) \$3,500.00.
- Dam Control Application (DAM) \$300 application fee. (Fee applies to each dam certificate to be issued for new, modification, abandonment, or transfer categories.)
- Permit Revision (REV) \$2,000.00, if significant.
- Incidental Boundary Revision (IBR) \$2,000.00, if significant.
- Permit Renewal (RNW) \$3,000.00, if Quarry \$500.00.
- Permit Amendment (AMEND) \$2,550.00.
- Permit Transfer (19A) \$1,500.00 per permit, Quarry \$500.00 per permit.
- Operator Assignment (19) \$1,500.00 per permit.
- Inactive Status (INA) \$2,000.00, Quarry is free.
- Coal Removal for Construction Purposes (4C) \$3,500.00, paper application.

The West Virginia Department of Environmental Protection (WVDEP) Division of Mining and Reclamation has implemented the following new reporting standards.

Effective January 1, 2009:

- The new eMap file should conform to the WVDEP eMap standards and be attached in the "Maps and eMap Data Section" toward the end of each application. See documentation in that section.
- The "Maps and eMap Data Section" should generally contain, where appropriate, the proposal, drainage, and subsidence control maps along with the eMap. Please attach other drawings and maps in the specific section where they are discussed.
- DO NOT refer to any information existing only in another application, please provide the information in this application.

D-1. CCI	incate of insurance		
D1.	Include a current Certificate of Insurance:		
	Policy Number: 013811408R3	Expiration Date: 09/23/2015	

Instructions: Bonding Instructions

Complete Bond Calculation Tables (D-2 Table 1-4) for each mining category applicable within the site boundary. It is **very important** that you complete this section in sequence they appear in the menu.

For Loadout Only and Haulroad Only sites, you do not need to complete a Bond Calculation Table.

Upon completion of the tables, you are ready to complete the General Bonding Section. Here you will break the site down by increment(s) and mining categories. You will see 3 additional options here that you do not have a direct Bond Calculation table for: EPZ Fill, contemporaneous reclamation waiver, and haulroad only. These are only available at this level, to properly reflect the override in rate from the tables.

If any of the tables are **changed after** the General Bonding Section and Bond Totals sections have been visited, you will need to open these pages in sequence and mark the section as incomplete and save the pages. This allows them to repopulate with the newest information and redo the calculations in these pages.

For Renewal applications:

Change in Bonding Method is allowed: full to incremental and incremental to full. Here again, complete Tables then go to General Bonding Section. When this page opens, before you start to make any changes, look down at your list of increments, their acres and mining category breakdowns. If any of this information is incorrect or missing (mining category breakdowns with acres) contact DEP and have this resolved. Once the information is updated in ERIS, DEP internal system, you will need to RESET this page to bring over the newest information. Double check the information after the reset and repeat if necessary.

_1 •	Prime	Farm	land	Inforn	nation

F-1.	Did the applicant's reconnaissance inspection or soil survey indicate that all or any part of the proposed							
	permit area is prime farmland? O Yes No							
	If Yes, submit a soil survey to confirm the exact location of such lands. <i>Identify</i> survey as <i>Attachment F-1</i> and delineate the area of prime farmland on the PROPOSAL MAP.							
	See Attachment F-5							
	If No, provide the basis for this response by checking the item(s) that apply: No land within the proposed permit area has been historically used for cropland. The slope of all land within the proposed permit area is ten percent (10%) or greater. Other factors (i.e., rocky surface, frequent flooding) disqualify the land as prime farmland. A qualified person other than the applicant has conducted a soil survey and determined in writing that no prime farmland is present. Identify this determination and provide results of the soil survey. Identify as Attachment F-1.							

F-2: Existing Land Use Information

F-2. Indicate the existing land uses within the proposed permit area:

NOTE: If you selected "Previously Mined and Not Reclaimed", then delineate on PROPOSAL MAP those areas that were previously mined and not reclaimed.

Primary	Secondary	Land Use Name	Action		
O		Hayland or Pasture 🗸		New	
0	•	Forestland ~		New	

F-3: Land Use Change Information

ĺ	F-3.	Has there been a land use change during the five (5) years preceding the date of this application?
l		○ Yes No
l		
l		If Yes, describe the historic land use:
l		
п		

F-4: Postmining Land Use Information

F-4. Indicate the postmining land uses below.

Primary	Secondary	Land Use Name		Action	J
	0	Hayland or Pasture	~	New	

•	Electronic Submission System 1 mining
	Describe the methodology for the determination, and the maintenance program for said postmining land use. <i>Identify as Attachment F-4.</i>
	See Attachment F-4
	If a postmining land use change is indicated, the premining land use and postmining land use must be included in the advertisement. The request for postmining land use change must meet the criteria described in the Surface Mining Reclamation Regulations.
	oductivity of Land Prior to Mining Information
F-5.	Provide, using the best information available, a description of the productivity of land prior to mining and the average yield of food, fiber, forage or wood products from such lands obtained under high levels of management. <i>Identify as Attachment F-5.</i>
	See Attachment F-5
	Information on productivity and yield was obtained from the National Resources Conservation Service National Cooperative Soil Survey.
	pability of Land Prior to Mining and After Reclamation
F-6.	Provide, using the best information available, a description of the land's capability to support a variety of uses prior to mining AND after reclamation. <i>Identify as Attachment F-6.</i>
	See Attachment F-6
G-1: Aff G-1.	fected Publicly Owned Park Information Will any publicly owned parks be affected by the proposed operation?
G-1.	Yes No
	○ res ● No
	If Yes, name and locate them on the PROPOSAL MAP and describe the measures to be taken to minimize of
	prevent adverse impacts from mining on these areas. Identify as Attachment G-1.
	storic Places and Archaeological Site Protection Information
G-2.	Describe any cultural or historic resources listed, or eligible for listing on the National Register of Historic Places and any known archaeological sites within the proposed permit area and adjacent areas. Include a description of the measures to be taken to protect these resources. <i>Identify as Attachment G-2.</i> If None,
	check here:
G-3: Sta	ate Historic Preservation Officer Information
G-3.	The applicant shall provide to DEP, as a separate package, the following information for the State Historic Preservation Officer (SHPO) review and subsequent response:
	 A. Two topographic maps of the proposed mining site and surrounding area; 1. One at a scale of 1" to 500' color coded to show the boundaries and extent of the proposed
	surface mining operation; and 2. One at a scale of 1" to 2000' to show boundaries of the proposed surface mining operation.
	B. Photographs of any structures (excluding trailers and temporary buildings, any structure built within
	B. Photographs of any structures (excluding trailers and temporary buildings, any structure built within the past twenty-five years, and equipment) situated on the proposed mining operation and directly adjacent to the operation; and
	C. A statement of the conditions of the proposed surface mining operation with particular attention giver to any known historic, cultural, or archeological resources.
	Identify as Attachment G-3.
	Final SHPO clearance has been attached.

H-1: Fish and Wildlife Information

H-1. Provide fish and wildlife resources information for the proposed permit and adjacent area. Give a general overview for these areas including but not limited to habitat and forest cover types; physiographic region; common, unique, or important game and other indigenous plant and animal species. *Identify as Attachment H-1*.

See Attachment H-1

H-2: West Virginia Division of Natural Resources Wildlife Resources Section

H-2 Attach the West Virginia Division of Natural Resources, Wildlife Resources Section, Wildlife Lands Inquiry Response application letter and corresponding response.

Identify as attachment H-2.

The Lands Inquiry Database Request and approval have been attached.

H-3: Site Specific Habitats or Species of Concern

H-3. Provide site-specific resource information necessary to address the respective habitats or species of concern if any, identified on the Wildlife Lands Inquiry Response. *Identify as attachment H-3*.

The Wildlife Resources Lands Inquiry Response from the West Virginia Division of Natural Resources has been included in Section H-2. All runoff from the proposed operation will be routed through sediment structures which will be monitored by the storm water requirements of the National Pollution Discharge Elimination System (NPDES) Water Pollution Control Permit which will diminish any adverse effect from occurring to the watershed as a result of this mining operation.

H-4: Endangered Species Act

H-4. Provide information at the site-specific level regarding endangered species and their habitats. Attach the applicant's initial application/notification letter to the West Virginia Department of Environmental Protection pertaining to the site-specific endangered species consultation relative to the proposal. (See permit handbook, section 27-4 for guidelines and applicability.) Attach the corresponding West Virginia Department of Environmental Protection response. In chronological order, continue to provide any further related documentation, determinations, correspondence, or related studies (e.g. bat survey, if applicable) up to and including completion/closure of consultation with the West Virginia Department of Environmental Protection. *Identify as attachment H-4*.

A site-specific endangered species consultation closure letter has been attached.

H-5: Disturbance and Adverse Impact Information

H-5. Provide a description of how, to the extent possible using the best technology available, the operator will avoid and minimize disturbances and adverse impacts to fish and wildlife and related environmental values during the surface mining and reclamation operations. Include protective measures that will be used during active mining. Also include restoration and enhancement measures that will be used during reclamation, where practicable. Where the plan does not include these measures, a statement shall be given explaining why they are not practicable. *Identify as attachment H-5.*

Only an area necessary to efficiently conduct shaft development activities will be permitted. Runoff will be directed into the sediment control structure before discharging into local streams. Finished slopes will be seeded as soon as practical. Sedimentation control will be completed prior to any disturbance. Regular maintenance of the sediment control structures should minimize adverse impacts on fish and wildlife.

Through the mining, reclamation and sediment control plans, adverse impacts to fish and wildlife, and related environmental values will be minimized.

The Lands Inquiry Response was applied for by the applicant and has been provided. The Lands Inquiry Response identified Elk Creek as a high quality stream. The project is not anticipated to have any adverse impacts on Elk Creek due to proposed NPDES and SMCRA permit requirements.

I-6: Geologic Information Waiver Request

I-6.	Does	the applicant request a waiver of the requirement to provide certain geologic information?
	Ye	
	0.0	3 0140
	If Yes	s, address A. and B. below:
	A.	Check the type of waiver(s) requested:
	(Results of test borings as requested in I-11.
		✓ Engineering properties of soft rock for underground mines as requested in I-12.
	В.	Provide the specific source of existing equivalent information available upon which the request for waiver is based. <i>Identify as Attachment I-6.</i>
	See /	Attachment I-12
I-7: Certi	fied Gec	plogic Cross Sections
I-7.		ide certified geologic cross-sections which include the following: Identify as Attachment I-7.
	A.	Nature and depth of the various strata or overburden including geologic formation names and/or geologic members as described by the U.S. Geological Survey or other published geologic reports;
	B.	Presence of any known structural features such as faults, fractures, anticlines, synclines, and monoclines;
	C.	Depth of weathering identified during exploration and drilling;
	D.	Nature and thickness, in inches, of all coal or rider seams above and immediately below the proposed coal seam(s) to be mined;
	E.	Nature and thickness of the stratum immediately beneath the lowest coal seam to be mined;

See Attachment I-7 and Geologic Cross Section A-A' (comprised of Drawing Nos. B10-548-M6 and B10-548-M17) and Geologic Cross Section B-B'

Denote any potentially acid-producing materials, topsoiling, and durable materials.

under the baseline ground water information section; and

Vertical distribution of aquifers and the name(s) of the stratum (or strata) in which the water is found.

For each aquifer system, show the seasonal fluctuations in head and general water quality information. Also, provide appropriate cross-references to the detailed water quality information

(Drawing No. B10-548-M7).

I-8: Certified Geohydrologic Map

F.

- I-8. Provide a certified geohydrologic map identifying the following: Identify as Attachment I-8.
 - NOTE: Proposal map can be utilized only if this additional information does not make the map difficult to read.
 - A. Locations (latitude and longitude) and elevation of all bore holes and sampling sites;
 - B. All minerals croplines and the strike and dip of the coal to be mined;
 - C. Existing or previous surface mining limits with their permit numbers;
 - D. Location and extent of known workings of any underground mines and auger mined areas, including mine openings to the surface. Label these openings as to whether they are currently discharging water or are known to have discharged water in the past;
 - E. Areal extent of aquifers with the name(s) of the stratum (or strata) in which the water is found and show the anticipated direction of water movement;
 - F. Location and depth of all oil and gas wells, and their Office of Oil and Gas permit numbers, for all wells which are within the proposed mining limits (surface or underground) and/or within 1000 feet of the proposed permit boundary;
 - G. Presence and attitude of any known structural features such as faults; axial traces of synclines, anticlines, and monoclines; and any recognized fracture patterns of lineament traces;
 - H. Location of geologic cross-section(s).

See Attachment I-8, the Geohydrologic Map (Drawing No. B10-548-M5), Pittsburgh and Redstone Seam Mining Map (Drawing No. B10-548-M2) and the drawing entitled Gas Well Information Tables (Drawing No. B10-548-E3).

I-9: Detailed Geologic Description

- I-9. Provide a detailed geologic description of the permit and adjacent areas which include the following: *Identify* as Attachment I-9.
 - A. Stratigraphic and lithologic descriptions of the area to be affected by mining;
 - B. Hydrogeologic setting including the areal and vertical distribution of all aquifers; seasonal differences in head; the name(s) of the stratum (or strata) in which the water is found; and the availability, movement, quality of ground water flow in all aquifer units;
 - C. Structural geology of the coal seam and the strata to be affected by mining both in the permit and adjacent areas, including faults, folds, fracture and lineament traces, and regional and site specific strike and dip;
 - D. Geochemical character of all strata and coal to be disturbed by mining and the potential of this strata for generating acid, alkaline, or iron-laden drainage;
 - E. Depth and degree of weathering of area strata and the effects this weathering has on the physical and geochemical properties of the overburden proposed for disturbance;
 - F. Effects of fracturing and weathering on the extraction of coal and the hydrologic regime;
 - G. Anticipated impacts of all proposed and existing operations on the geology and hydrology of the area, including impacts resulting from multiple seam mining and subsidence;
 - H. For underground mining operations (including auger mining) indicate whether or not there is the potential for gravity discharge(s) and the anticipated quantity and quality of the discharge(s) from each potential discharge site. For non-gravity discharge situations, indicate the potential for seepage along the outcrop barrier and the potential hydraulic head which might result in the underground workings. Indicate if the potential discharge will require chemical treatment.

See Attachment I-9, the Geologic Cross Section A-A' (comprised of Drawing Nos. B10-548-M6 and B10-548-M17) and Geologic Cross Section B-B' (Drawing No. B10-548-M7) and the Geohydrologic Map (Drawing No. B10-548-M5).

١	I-10·	Geo	ogic	Bore	hole	l oa

I-10. Provide complete Geologic Borehole Log for all test borings and coreholes in the proposed permit and adjacent area.

This data is to be provided in EQuIS (Environmental Quality Information System) MEDD (Multimedia Electronic Data Deliverable) format. Completed MEDDs should be attached to this page.

Multimedia Electronic Data Deliverables and their templates are available here:

When preparing an application for initial submission to DEP you should **not** attempt to register your site at this point in time with EQuIS. You need to obtain the template files and use them to report the analysis information, where you will leave the Site and Sub-Site columns empty. The EQuIS site registration process requires you provide your permit number, which DEP does not issue until your application has been submitted and fees paid. During the review of your application the DEP Reviewer will provide guidance as to when to do the EQuIS site registration.

To reference any **existing** Geologic Borehole Log Data in EQuIS system, provide the site number, sub-site number and location codes below.

	are there significant Aquifers on the proposed permit area, adjacent areas and/or areas over the proposed nineral extraction?					
	Yes O No					
	Yes, Provide a description to include discharge rates or usage and depth to water under seasonal					
	conditions. <i>Identify as Attachment J-5</i> .					
[See Attachment J-5					
Pro	bable Hydrologic Consequences Information					
	Provide a statement describing the Probable Hydrologic Consequences (PHC) of the Proposed mining operation, with respect to the hydrologic balance, on the permit area, adjacent areas, and over the proposed mineral extraction. The statement must provide the following information:					
	Identify as attachment J-6.					
	WATER QUANTITY:					
	 Whether the proposed operation may result in water supply diminution or interruption for any ground of surface water source currently being used for domestic, agricultural, industrial or any other legitimate purpose; 					
	 Potential Impact the Proposed operation will have on flooding or streamflow alteration, including chans scoring and dewatering of streams; 					
	 Whether the proposed operation will disturb aquifers that significantly insure water use; Potential effects of the proposed operation on ground and surface water availability. 					
	WATER QUALITY:					
	 Whether the proposed operation may result in water supply contamination for any underground or surface water source currently being used for domestic, agricultural, industrial, or any other legitimate 					
	 purpose; Whether acid or toxic forming materials are present which could result in the contamination of surface ground water 					
	 Potential Impact the proposed operation will have on sediment yield; Potential impacts resulting from increases in total hot acidity, total suspended solids, dissolved solids, and other important water quality parameters. 					
	GRAVITY DISCHARGE/OUTCROP SEEPAGE:					
	 Potential for gravity discharge from the underground workings during and after mining, the potential impacts resulting from the complete failure of the outcrop barrier, and the formation of outcrop seepag faces. (Provide calculations) 					
	See Attachment J-6					
РΗ	C indications of Contaminated, Diminished, or Interrupted Ground Water					
[Does the PHC indicate that a currently used or significant ground water resource is likely to be contaminated, diminished, or interrupted?					
	○ Yes ● No If Yes, provide the following information. <i>Identify as attachment J-</i> 7					
,	A. Identify the alternative water source(s) and provide a detailed description of any aquifer, developed or undeveloped, proposed as an alternative water source;					
	 If the alternative source(s) is developed, show the location on the proposal map using designation AW-AW-2, etc. 					
	 If the alternative source(s) is undeveloped, provide proposed plans and specifications. 					

J-8: PHC indications of Contaminated, Diminished, or Interrupted Surface Water

N-3: Su N-3.		ining/Augering Within Underground Mine Boundary Information face mining and/or augering to occur within 500 feet of an underground mine?
14 -0.	O Y	
		s, Complete the following:
	A.	Indicate the status of the underground mine:
		○ Abandoned ○ Active ○ Temporarily Inactive ○ Explain Below
	B.	Provide the following information. <i>Identify as Attachment N-3</i> Office of Miner's Health, Safety and Training approval and subsequent MSHA Approval;
		 Approval of the underground operator and/or owner; and A description of impact of this proposed operation upon underground mining.
		, tassanpas na mpasta ana propossa aparanan apan anas grasina manag
N_4: To	mnoran	y Storage and Final Disposal of Waste Information
N-4.		vide a description of the measures to be used for the temporary storage and final disposal of waste such
		grease, lubricants, paints, flammable liquids, garbage, abandoned machinery, timber, brush, treatment
		micals (flocculents, pH adjusters, coal processing, etc.), and other combustibles generated during the ing activities. <i>Identify as Attachment N-4</i>
	Wa	ste generated by this operation, including grease, lubricants, paints,
		nmable liquids, garbage, abandoned machinery, mine timbers, timber brush, atment chemicals, or other combustible materials, will not be buried or
		manently disposed of on site. Oil products and by-products shall be stored in
		tertight containers until they can be picked up by an approved waste
		nagement company for disposal off site. Merchantable timber may be sold. Ish that is cleared from the site shall be burned in accordance with local laws
		d regulations.
		e: Identify all temporary and permanent storage and/or disposal sites on the PROPOSAL MAP or SITE

<u>N-5: Unc</u>	<u>derground Mining Boundary Information</u>
N-5.	Has underground mining occurred within the boundaries of the proposed permit area?
	Yes
	If Yes, provide a description of the potential effects subsidence may have on structures such as dams, coal waste disposal areas, fills, and other such structures. <i>Identify as Attachment N-5</i>
	There are no dams or coal waste disposal areas over the area being added in this application. A small temporary fill will be constructed but should not be affected by previous mining. There are no other structures that should be affected.

O-1: Surface Configuration Cross Section Depiction

- O-1. Provide cross-sections depicting the surface configuration prior to mining, during mining, and following reclamation. Cross-sections shall identify the following:
 - A. All materials requiring special handling;
 - B. Coal seams to be mined;
 - C. Topsoiling material; and
 - D. Permit Boundary.

Identify as Attachment O-1.

105574	On-site at shaft pad	105574
	YD) `	YD)

O-3: Backfilling and Regrading Requirements Compliance Information

O-3. Provide a description of how the operation will comply with backfilling and regrading requirements.

Identify as Attachment O-3.

GENERAL BACKFILLING AND GRADING PLAN

Final reclamation of the mine will involve the sealing the mine slope openings and backfilling the mine face-up. No toxic and/or acid producing materials will be used for the backfilling operation. The slope will be backfilled and sealed in accordance with MSHA requirements, and the West Virginia Office of Mine Safety and Health. The post mining configuration will conform to a slope necessary to achieve the required minimum long-term static safety factor of 1.3. Refer to the enclosed cross-sections for specific details.

Revegetation will be kept current by establishing a permanent vegetative cover on regraded areas by the end of the second growing season. Operable regrading equipment will be kept on the permit area or adjacent permits until satisfactory completion of grading unless otherwise approved by the Director.

The operator shall establish on all regraded areas and all other disturbed areas a diverse, effective and permanent vegetative cover of the seasonal variety native to the area, or introduced species that are compatible with the approved postmining land use. This established vegetative cover shall be capable of stabilizing the soil from erosion, regeneration and plant succession. At a minimum, a temporary or permanent vegetative cover shall be established by the end of the first growing season and a permanent vegetative cover shall be established by the end of the second growing season.

TIME SCHEDULE FOR REGRADING AND BACKFILLING

Regrading and backfilling will be completed as contemporaneously as practicable with mining operations and as reflected on the approved mining and reclamation plan. Provided, however, that reclamation activities shall be initiated within thirty (30) days, and final backfilling and regrading shall be initiated within one hundred eighty (180) days of completion of underground operations. Should site conditions or weather make adherence to these guidelines impractical, the period of time required to be current may be reasonably extended by the director.

COMPLIANCE WITH BACKFILLING & GRADING TIME LIMITS

O-4: Delay of Contemporaneous Reclamation Variance Request

O-4.		variance for delay of contemporaneous reclamation requested? Yes No
		s, provide the following information. E: If Yes and approved by DEP, bond rate is \$5,000 per acre.
	A.	From which standard(s) is variance sought? (i.e., acreage, time and/or distance limits)
	B.	For each standard from which a variance is sought, state a specific alternative limit of the same type.
	C.	A narrative statement supported by documentation and sound scientific and/or engineering data that describes and demonstrates on the basis of site-specific conditions that compliance with the standard(s) is technologically and economically infeasible.
	D.	A sequential plan showing all phases of mining and reclamation, including specific time frames for completing each phase. The plan must describe at what point reclamation operations will commence and how such operations will advance in relation to mining operations throughout all proposed operations.
	E.	Describe any environmental impacts that may result from the delay in reclamation;
	F.	Identify on the PHASE MAP the specific surface areas for which a variance is requested
	Iden	tify as Attachment O-4.

0-	5: A	p	proximate	Origi	nal	Contour (AOC	Variance Req	uest

<u></u>	<u>0-5: Approximate Original Contour (AOC) Variance Request</u>
C	O-5. Is a variance from approximate original contour (AOC) being requested for:
	 A. Remined Areas Yes No If Yes, provide the following information: A demonstration that the volume of reasonably available spoil is insufficient to completely backfill the reaffected or enlarged highwall; A demonstration that any highwall remnant left after mining will be stable and not pose a hazard to the public safety or the environment.
	Identify as Attachment O-5 - Remined Areas.
	NOTE: If Yes, attachment is required.

 B. Steep Slope Areas	
 forestry, cropland, residential or public (facility) use; All highwalls will be completely backfilled in a manner that results in a static safety factor of 1.3; Only spoil not necessary to achieve the postming land use may be removed from the mine bench; The watershed of the permitted and adjacent areas will be improved by reducing pollutants, environmental impacts or flood hazards; provided that, the watershed will be deemed improved only if: 	
 The amount of total suspended solids or other pollutants discharged to ground or surface water from the permit area will be reduced, so as to improve the public or private uses or the ecology of such water, or flood hazards within the watershed containing the permit area will be lessened by reduction of the peak flow discharge from precipitation events or thaws; and The total volume of flow from the proposed permit area, during every season of the year, will not vary in a way that adversely affects the ecology of any surface water or any existing or planned use of surface or ground water; 	
 Appropriate federal, state, and local government agencies were provided an opportunity to comment on the proposed postmining land use and deemed it to be an equal or better economic or public use; The plan is designed and certified by a registered professional engineer to assure stability, drainage, and configuration necessary for the intended use of the site; The surface landowner requested in writing that a variance be granted to achieve the approved alternative postmining land use; The alternative postmining land use requirements are met; All other applicable requirements of the Act and regulations, except for those relating to AOC, are met. 	
Identify as Attachment O-5 - Steep Slope Areas. NOTE: If Yes, attachment is required.	
	_
 C. Mountaintop Removal Areas Yes No If Yes, provide the following information: Alternate postmining land use request (Complete F-4 of this application); The proposed postmining land use of the affected land is limited to industrial, commercial forestry, cropland, residential or public (facility) use; The proposed use constitutes an equal or better use compared with the premining use; The proposed use will be compatible with adjacent land uses and existing state and local land use plans; County commissions and other state and federal agencies were provided an opportunity to review and comment on the proposed land use; The application contains a specific plan and assurances that the proposed postmining land use will be: Compatible with adjacent land uses; 	
 Practicable with respect to financing and completing the proposed use; Supported by commitments from public agencies where appropriate; Planned pursuant to a schedule attached to the reclamation plan so as to integrate the mining operation and reclamation with the postmining land use; Designed by an approved person to assure the stability, drainage, and configuration necessary for the intended use of the site; and Obtainable according to data regarding expected need and market. All other requirements of the Act will be met. Identify as Attachment O-5 - Mountaintop Removal Areas. NOTE: If Yes, attachment is required.	

D. Identify on the PROPOSAL MAP the specific surface areas for which a variance is requested.

O-6: Backfill Benches Minimum 1.3 Static Safety Factor Information

O-6. Provide a description of techniques to be utilized, including stability analyses to demonstrate that the backfilled benches will meet a minimum static safety factor of 1.3.

Identify as Attachment O-6.

Final reclamation of the shafts will involve backfilling. The backfilled slope will be of such as to achieve a long term static factor of safety of 1.3. A stability analysis for the backfilled bench is enclosed.

O-7: Seal and Management of Mine Openings Information

O-7. Provide a description of the measures to be used to seal or manage mine openings, exploration holes, auger holes, boreholes, wells encountered and other openings within the proposed permit areas. Include design specifications for ensuring stability under anticipated hydraulic heads for each permanent entry seal and downslope barrier. Include drawings, etc. required to adequately support the description of the proposed measures.

Identify as Attachment O-7.

There are no known unsealed mine openings, exploration holes, auger holes, boreholes or wells. Drawing No. B10-548-A7 is a typical seal detail for boreholes, drill holes/wells. Typical seal details for mine openings and auger holes are shown on Drawing Nos. B10-548-A7, B10-548-A8 and B10-548-A14.

O-8: Acid/Toxic Strata Burying, Blending, Segregating and Treating Plan

O-8. Provide a plan for burying, blending, segregating, and/or treating acid/toxic strata to avoid adversely affecting water quality and revegetation. Include drawings, etc. required to adequately support the plan. Identify as Attachment O-8.

See Attachment O-8

O-9: Planting Plan

- O-9. Provide a planting plan which includes the following:
 - A. A prediction of the minesoil character based on overburden analysis, soil analysis, and other available information:
 - B. Proposed treatment to neutralize acidity;
 - C. Method of mechanical seed bed preparation;
 - D. Application rates and analysis of fertilization;
 - E. Application rates and types of mulch;
 - F. Application rates and species of perennial vegetation including herbaceous and woody plants:
 - G. Areas to be planted or seeded to trees and shrubs;
 - H. A maintenance schedule and procedures; and
 - I. A plan for temporary vegetation cover to include the following:
 - Species
 - · Seeding rate; and
 - · Timing.

Identify as Attachment O-9.

See Attachment O-9

O-10: Postmining Land Uses

O-10.	O-10. Postmining land uses indicated in F-4 of this application.				
	Primary	Secondary	Land Use Name		
		0	Hayland or Pasture	~	

-1.		ide a map showing ephemeral/intermittent stream delineations in accordance with the WVDEP ober 1999 Guidance Policy for all obvious channels within 100 feet of the proposal area.
	Com	nment below or Attach P-1 Map.
	See	Drawing No. B10-548-M18
	pere	s this stream delineation indicate that a variance to disturb land within 100 feet of an intermittent or nnial stream is required? Yes No
	If Ye	s, provide a narrative to show that surface mining activities will not:
	A.	Adversely affect the water quantity of the stream;
	В.	Adversely affect the water quality of the stream;
	C.	Adversely affect other environmental resources of the stream (e.g. physical, biological, water uses, etc.);
	D.	Cause or contribute to violations of applicable state or federal water quality standards.
	Desc	cribe below or Attach P-1 Narrative.
		Attachment P-1 and the Request for Jurisdictional Determination

P-2: Perennial Stream	Sediment Control	Structure	Variance	Request
-----------------------	-------------------------	-----------	-----------------	---------

P-2.	Is a variance requested to locate a sediment control structure in a perennial stream? Yes No
	If Yes, provide justification and demonstrate that there is no other suitable location for such structure. Identify as Attachment P-2.

P-3: Altera	ation/Relocation of Natural Stream Channel Variance Request
P-3.	Is a variance requested for a stream channel diversion?
	If Yes, indicate if the stream channel diversion is temporary or permanent and provide information required by the West Virginia Surface Mining and Reclamation Regulations for stream channel diversions. <i>Identify as Attachment P-3</i> .

<u>P-4: Use of Existing</u>	<u>Drainage Structures</u>
-----------------------------	----------------------------

-	000 0	<u> </u>
ĺ	P-4.	Are any existing drainage structures proposed to be used?
l		Yes
ı		If Yes, provide information in 'Existing Drainage Structures'.

P-5: Sediment Control Structures Capacity Information

O		Electronic Submission System Finding
P-5.		I sediment control structures, including temporary sediment control, have the capacity to store acre-ft. of sediment for each acre of disturbed area? No
		provide a justification for alternate storage requirements which demonstrates that effluent limits will et. <i>Identify as Attachment P-5.</i>
P-6: Con	structed D	rainage Structure Permanent Impoundment Information
P-6.		y drainage structure be constructed in a manner which will create a permanent impoundment?
	If Yes,	identify permanent structures and provide documentation for the following:
	A.	Size and configuration will be adequate for its intended purpose;
	B.	Structure will not result in the diminution of the quality and quantity of water utilized by adjacent or surrounding landowners or agricultural, industrial, recreational, or domestic use, and
	C.	Structure will be suitable for the approved Postmining land use.
	Identif	y as Attachment P-6.
		ment Control Structure(s) Information
P-7.	Provid	e the following information for each drainage or sediment control structure:
	A.	Description, location map, plan view, profile, and cross sections of the structure;
l	B.	Geotechnical investigation (if applicable);
	C.	Complete and accurate design and construction specifications;
	D.	Sequence or timetable for construction in relation to the disturbed area to be controlled;
	E.	Operation and maintenance procedures, including methods and location for disposal of the sediment and/or sludge;
	F.	Timetable and plans to remove each structure, including permanent structures;
İ	G.	Drainage control for all regraded areas;
	H.	Engineering techniques used in design of structures; and
l	l.	Certification and periodic inspection procedures.
	NOTE	 Design plans, cross-sections, and profiles of engineered structures must be based on mapping or surveying data of adequate detail and accuracy. The registered professional engineer or licensed land surveyor certifying design of such facilities is responsible for insuring such adequacy.
	Identify	y as Attachment P-7.

P-8: Temporary Drainage Control Structure(s) Information

See Attachment P-7 and Drawing Nos. B10-548-E6 & B10-548-E24

P-8.	Provi	ide the following information for each temporary drainage control structure:
	A.	Description, location map, plan view, profile, and cross sections of the structure;
	В.	Complete and accurate design and construction specifications;
	C.	Sequence or timetable for construction in relation to the disturbed area to be controlled;
	D.	Certification and periodic inspection procedures.
		tify as Attachment P-8.
	See	Attachment P-8 and Drawing Nos. B10-548-A2 and B10-548-A3

P-9: Component Drainage Table

P-9. Complete the following table:

Drainage Structure	Drainage Area(s)	Total Acres	Disturbed Acres	Required Volume Acre- Feet	Designed Volume Acre-Feet

S-1.								
	Yes No If Yes preside the following and exemple to items S 2 through S 6:							
	If Yes, provide the following and complete items S-2 through S-6: A. Topographic Map of a scale 1"=1,000' (<i>Subsidence Survey Map</i>);							
	B. Mine Development Map; and							
	C. Supplemental Mine Maps.							
	See Drawing Nos. B10-548-M2, B10-548-M3, B10-548-M4 and B10-548-A1							
	bsidence Survey Critical Angle Identified Object(s)							
S-2	Does the subsidence survey identify any of the following within 30 degree angle of draw above the proposed							
	underground workings? (Minimum 30 degree angle of draw unless otherwise specified)							
	A. Perennial and/or intermittent streams?							
	B. Structures? No No							
	C. Renewal Resource Lands?							
	D. PSD or Municipal Water Works? Yes No							
	If Yes to A., B., C., and/or D. above, identify (location and type) on the TOPOGRAPHIC MAP.							
<u>-3: Su</u>	bsidence Control Plan Submittal Requirement Waiver							
S-3.	Is a waiver of the requirement to submit a subsidence control plan requested?							
	○ Yes No							
	If Yes, provide supporting documentation that subsidence will not cause material damage or a diminution in							
	the reasonably foreseeable use of any streams, structures or renewable resource lands.							
	If No, provide a subsidence control plan in accordance with West Virginia Surface Mining and Reclamation Regulations.							
	Identify as Attachment S-3.							
	See Attachment S-3							
-∕l· ∐n	nderground Mine Abandonment Plan							
S-4.								
>- 4.	Provide an underground mine abandonment plan to include the following:							
	 A. Width of outcrop barriers; B. Type and number of permanent seals proposed, their design details and proposed materials to be 							
	used for construction; and							
	C. Maximum head of water expected on the outcrop barriers and mine seals.							
	Identify as Attachment S-4.							
	See Attachment S-4							
-5· ^^	knowledgement of Restoration of Subsidenced Damaged Material							
-5: AC S-5.	Provide written acknowledgment that if subsidence causes material damage or reduces the value of							
.	reasonably foreseeable use of the surface lands, the land will be restored to a condition capable of supporting							
	uses it was capable of supporting before subsidence regardless of the right to subside. Identify as							
	Attachment S-5.							
	In the event the mining proposed produces subsidence that causes damage to the							
	surface lands, which reduces ther foreseeable use of the surface lands, or causes							
	material damage, then the applicant will, to the extent technically feasible, restore							
	the land to a condition capable of supporting the uses that it was capable of supporting before the subsidence, regardless of the right to subside.							
	supporting before the subsiderice, regardless of the right to subside.							
6.0-	mingle Water from Underground Works Variance Degreet							
	p-mingle Water from Underground Works Variance Request							
6-6.	Is a variance to co-mingle water from underground works requested?							
	○ Yes ● No							

Is blasting proposed? Yes No
is biasting proposed: Sites Sites
If Yes, complete this entire section and attach a BLASTING MAP.
Once the application is approved, any changes to this map or plan must be approved by the Secretary.
T-2: Blasting Operations
Will blasting operations be conducted within 1,000 feet of any building used as a dwelling, public building, school, church, or community or institutional building?
○ Yes ● No
If "Yes", show a 1000 feet radius from from the structure(s) into the permit area, and complete the following:
A. Is a site specific blast design included? O Yes O No
If "No", submit and obtain approval prior to blasting within 1000 feet of structure(s).
B. Will blasting operations be conducted within 300 feet of a protected structure?
Yes No If "Yes", provide a waiver allowing blasting within 300 feet, signed by the owner and occupant (if applicable).
тео , рестисс и темперия и помену и
T-3: Blasting Near Underground Mine
Will blasting operations be conducted within 500 feet of an underground mine?
● Yes ○ No
If No, go to T-4. If Yes, complete the following:
A. Show underground workings on map.
B. Attach WV Office of Miner's Health, Safety and Training approval. <i>Identify as attachment T-3B.</i>
C. Are works Active? Yes No If Yes, provide MSHA approval, Underground Operator As Approval and Safety measures to protect underground miners and operations during blasting. Identify as attachment T-3C.
D. Is a Site-Specific Blast Design included to address protection of the underground mines and miners and environmental concerns?
Yes No If "No", submit and obtain approval prior to blasting within 500 feet of underground mine.
T-4: Structure Owners and Occupants
A. Provide names and complete addresses for each owner and occupant, of protected structures or structures located within the pre-blast survey area as defined in WV Code (SCMRA) 22-3-13a(a)(1) and (2). <i>If the occupant</i>
is not the owner, list the name and address of both the owner and occupant.
If NONE, check here
B. Provide names and addresses of owners of all other manmade structures, located in the pre-blast area, not defined as protected structures as identified in 199CSR-1-2.2 (public utilities, underground mines, gas wells/lines, power lines, cemeteries, public roads, etc.), and not directly associated with a dwelling listed in "A".
If NONE , check here
C. For an IBR, amendment or revision, include a copy of the most recently approved T-4A and B list then indicate by a new list the structures added by this application
If N/A , check here If NONE , check here
Identify each and every structure shown on the Blasting Map.
Month and year list(s) complied (mm/yyyy): 11/2012
This date must be current to 1 year.

Zip:	-		Phone:	

T-5: Alternate Velocity or Airblast Limits

Are alternate peak particle velocity and/or airblast limits proposed for structures?

Yes No
If "Yes", provide as an attachment written permission from the owners of these structures.

T-6: Blasting Plan

General Blasting Plan

The following general blasting plan will be adhered to by the permittee. Any departures from this general plan must have approval of the Secretary prior to being implemented.

(If the permittee is proposing any departures from the general blasting plan, not already addressed in attachments T-1 through T-5, then identify below and provide attachment if applicable.)

No departures from the general blasting plan are proposed. The Applicant agrees to be subject to the Surface Coal Mining and Reclamation Act, Chapter 22, Article 3, Section 3A-5. At a minimum of 14 days prior to blasting, a site-specific blast plan, prepared and signed by a certified blaster, shall be submitted to and approved by the Office of Explosives and Blasting.

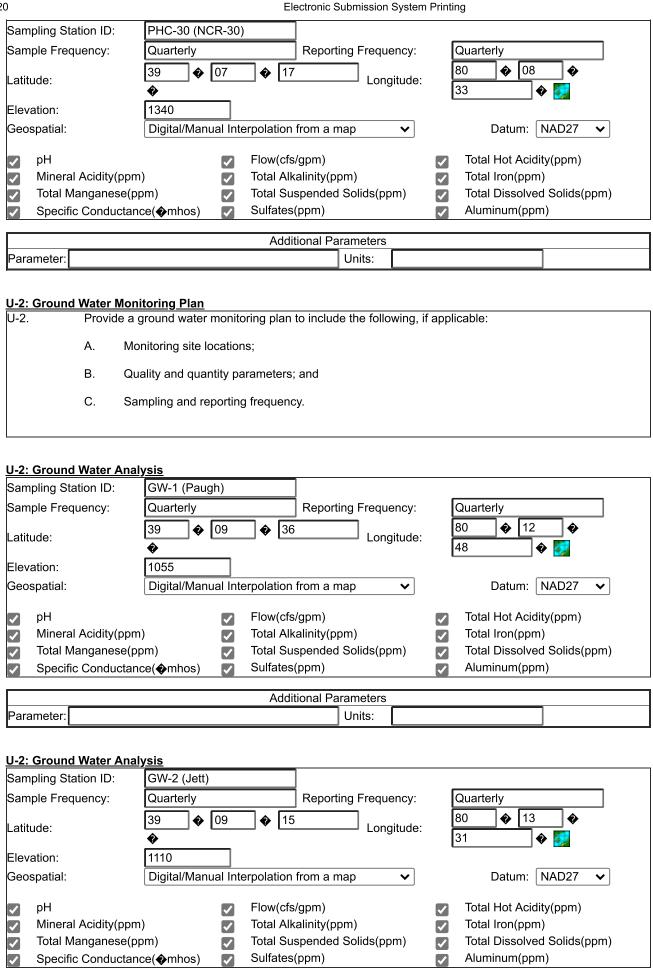

- A. For each shot, the blast record (log) will include information required by rule under 199CSR1-3.5 at a minimum. The approved blast record (log) form EB-37 will be used unless the Secretary approves an alternate blast log prior to use.
- B. Prevent adverse effects with attention given to the geological and topographical conditions depicted in pre-mine core drilling and site-specific information of current drill operations in the blast area.
- Consider weather effects such as wind speed and direction, temperature inversions, and cloud cover to minimize air blast and dust.
- Will employ safety precautions in designing, loading, and detonating a blast and when handling, transporting, storing, and disposing of explosives.
- E. Comply with limitations for ground vibration and air blasts (unless waived in item T-5) as prescribed by rule under 199CSR1-3.6c, h and i.
- F. Prevent injury to persons and damage to public and private property outside the permit area and prevent changes in the course, channel or availability of ground or surface water outside the permit area.
- G. At the blaster-in-charge discretion, traffic will be blocked when blasting in close proximity of public roads.
- Comply with WV Code 22-3-22a (blasting restriction/site specific blast design) requirements addressed items of this section.
- Comply with WV Code 22-3-13(b)(15) use of explosives and inventory.
- J. Agree to be subjected to WV Code 22-3A-5 (Underground mining operations are not subject to this).
- K. Incorporate a blasting inspection and monitoring program, including specific provisions for monitoring ground vibrations and air blast if this operation is a surface coal extraction operation. The monitoring will occur on the calendar quarter at minimum. One blast of each type (binder, pre-split, production) on same occurrence (first, second, third...) will be maintained. The seismograph will be set up and maintained in accordance with ISEE standards and located at the nearest "protected" or "other" structure, whichever is closest to the blast. Full waveforms will be attached to the blast log.
- L. Full wave forms will be attached to blast log within 24 hours if scaled distance is exceeded or any unusual circumstances occurs (fly rock, suspected air blast, etc.).
- M. The legal advertisement (use form EB-38) will include all required information and will be submitted to OEB prior to blasting. The type of warning device must be specifically identified. Any changes to the type of audible warning signals must be re-advertised and re-notification to residents.
- N. The letter of notification of the blasting schedule will be sent certified mail to local governments, public utilities, owners of other man-made structures and each resident within the pre-blast area and persons who regularly work in the pre-blast area to advise of the blasting schedule, warning signal and access control. The warning signal to be used must be consistently listed in form EB-38 and this notification.
- Comply with WV Code 22-3-13a pre-blast survey requirements and use forms EB-39, EB-39A, EB-39B, EB-39C and EB-39D.
- P. Any changes to the blast plan must be submitted to and approved by OEB.

U-1: Surface Water Monitoring Plan

If Yes, comp	plete items V-2 thro	ough V-4		

Section W: Underground Disposal Plan

W-1.	Is underground disposal of sludge, coal refuse, or slurry proposed? ○ Yes ⑥ No					
	If Yes, provide a description of the following:					
	A.	Method of disposal to include the source of transport medium;				
	B.	Percent of mine void to be filled (include mine maps);				
	C.	Location of active workings to include plans, specifications, and methods of constructing underground retaining walls;				
	D.	Potential areas of breakout;				
	E.	Effects of subsidence;				
	F.	Location of permanent monitoring wells or monitoring stations;				
	G.	Gradient of mine from the backfill area;				
	H.	Stratum underlying the mined coal;				
	I.	Source and quality of material being disposed;				
	J.	Treatment of discharged water;				
	K.	Contingency plan to address blowouts; and				
	L.	If applicable, MSHA Approval.				
	Identi	fy as Attachment W-1.				

Applicant's Certification of Application

Certification of Application

NOTE: If signer is other than President or Vice President, provide a current certified copy of Power of Attorney or Resolution of Board of Directors which grants signer the legal authority to represent the Applicant.

I, **Kevin J. Bealko** (type name), having been duly sworn,

depose and attest that all the representation contained in this application (and in the Centralized Ownership and Control File, where applicable) are true and correct to the best of my knowledge and belief, including ownership and control and violation history, and that I am a principal officer (*President, Vice President*) of the Applicant and that this application has been executed by the persons required by law. I further acknowledge that any information provided or omitted herein for the purpose of defrauding or misleading the West Virginia Department of Environmental Protection may result in the institution of criminal or civil charges and/or other enforcement actions pursuant to applicable state laws.

Include location map in accordance with regulations.					

eMaps: Maps and eMap Data Section

This section is to attach, where appropriate, the proposal, drainage, and subsidence control maps along with the eMap. Click the 'Attachments' button at the top right.

The eMap file is used by WVDEP to update the GIS database. It will prevent errors in representing the applicant's permit features that arise from manually georeferencing and digitizing scanned images of permit maps. It also will reduce misrepresentation due to data being out of date.

- 1. This file should contain a subset of features found on proposal/drainage and subsidence control plan maps.
- 2. A file is only required for actions that also require a proposal/drainage map, renewal/progress map, final map, or subsidence control plan map.
- 3. Applicants should use the available CAD templates for DWG files, or follow instructions for creating shapefiles or a personal geodatabase.

The eMap file for this application should conform to the WVDEP eMap standards as defined at the following location:

eMap Standards Requirements

WVDEP eMap AutoCAD Templates are available at the following locations:

Template files for North Zone

Template files for South Zone

A free dwg file viewer can be downloaded from the following location: (Click the "Download Now" button)

Free Autodesk DWG viewer

For any questions about the eMap file or standards, please contact:

Nick Schaer(Email: Nick.A.Schaer@wv.gov (mailto:Nick.A.Schaer@wv.gov) Phone: 304-926-0499 ext 1510) Mike Shank(Email: Michael.C.Shank@wv.gov (mailto:Michael.C.Shank@wv.gov) Phone: 304-926-0499 ext 1620)
