

JOIN MITSUI E&P AUSTRALIA FOR A COMMUNITY INFORMATION EXCHANGE SESSION

Wednesday, 29 May 2019

Function Centre, Shire of Irwin Recreation Centre

UPDATE ON MEPAU'S PROJECTS IN THE MID-WEST

MEPAU invites local residents to a community information exchange session regarding the next phase of exploration and development in the Shire of Irwin.

MEPAU personnel will be on hand to provide more information about our projects, answer questions and take your feedback throughout the session.

BACKGROUND

The Waitsia Field is located 14.5km east of Dongara. It is part of MEPAU's ongoing program to assess and develop gas reservoirs in the northern Perth Basin. Appraisal drilling in August 2014 resulted in a significant gas discovery, the Waitsia Gas Field.

The planning phase of the Waitsia Gas Project, which involves building a new gas plant near existing facilities off Pye Road, Yardarino, is underway. The plant is proposed to produce up to 250 TJ/day from conventional, free-flowing gas reservoirs.

The session is an opportunity for a two-way exchange of information. We'd like to update you on the latest plans for the Waitsia Gas Project, Decommissioning and Rehabilitation and ongoing operations and also to hear your views.

As with all MEPAU projects, we aim for open and ongoing dialogue about our projects with people in Mid West communities and beyond.
